*The American Encyclopedia and Dictionary of Ophthalmology (Classic Reprint)* Casey A. Wood,2015-08-04 Excerpt from *The American Encyclopedia and Dictionary of Ophthalmology* In adopting the strictly alphabetical sequence of subject headings it has been necessary to review for the first volume practically the whole range of the literature of Ophthalmology and its related sciences It will as a consequence easily be understood how difficult it has been to collect and treat with complete satisfaction all the subjects commencing with the first letter of the alphabet that directly and indirectly relate to the eye and its diseases However it is the belief of the Editor and his collaborators that no topic of importance has been neglected When a heading that quite evidently should have been noticed has been omitted or

more likely if new topics of interest arise after the publication of the volume to which they belong alphabetically they will receive due attention in the appendix In addition to the attempt to write and edit a comprehensive Encyclopedia of Ophthalmology the Editor has made an effort to combine with it a Dictionary of such English Latin French German and Italian words and phrases as will be most useful to students of ophthalmology in general This has been a heavy task beset with many difficulties In the first place it is not an easy matter to decide whether a particular word or phrase is of ophthalmic interest or not Broadly speaking the majority of medical and scientific subjects in the languages referred should be interesting and valuable to the educated ophthalmologist but if most of the words and phrases utilized in general medicine and surgery were so included the additions would pad this work to an unseemly degree Even as it is the inclusion of some of the terms already chosen although they were all taken from ophthalmic text books may give rise to criticism and to the imputation of 0 mere filling It will in this connection be noticed that the array of German words is much larger than those in other languages There are several reasons for this In the first place the German language occupies co a pre eminent position in the world of science and many Englishes speaking ophthalmologists have received a considerable portion of their foreign education in Germany and from Germans Consequently the excess of German words naturally represents the largest proportion of foreign literature accessible to the average English reader About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works The American Encyclopedia and Dictionary of Ophthalmology Casey Albert Wood,1917
