#### Angles in an isosceles triangle

- On a separate piece of paper, use a ruler to draw an isosceles triangle (draw 2 sides of equal length and then join them to form the 3<sup>rd</sup> side).
- Clearly mark the equal sides and then cut the triangle out neatly.
- Carefully fold the triangle in half so that the 2 equal sides lie directly on top of each other.
- Paste the folded triangle in the space below, so that it can flap open like a book.

When the triangle is folded closed, you should find that the angles lying on top of each other are the same size. Open the triangle and mark these angles in the same way to indicate that they are equal.

These angles are referred to as the **base angles** of the isosceles triangle (although they are not always at the bottom – it depends on the orientation of the triangle). They are the angles opposite the equal sides – and they are always equal to each other!

The base angles of an isosceles triangle are equal.  
 $B = C$  (In an  $\triangle ABC$ ,  $AB = AC$ )
