Tomorrow has never looked better Breakthroughs in fields like genetic engineering and nanotechnology promise to give us unprecedented power to redesign our bodies and our world Futurists and activists tell us that we are drawing ever closer to a day when we will be as smart as computers will be able to link our minds telepathically and will live for centuries or maybe forever The perfection of a post human future awaits us Or so the story goes In reality the rush toward a post human destiny amounts to an ideology of human extinction an ideology that sees little of value in humanity except the raw material for producing whatever might come next In *Eclipse of Man* Charles T Rubin traces the intellectual origins of the movement to perfect and replace the human race He shows how today s advocates of radical enhancement are like their forebears deeply dissatisfied with given human nature and fixated on grand visions of a future shaped by technological progress Moreover Rubin argues that this myopic vision of the future is not confined to charlatans and cheerleaders promoting this or that technology it also runs through much of modern science and contemporary progressivism By exploring and criticizing the dreams of post humanity Rubin defends a more modest vision of the future one that takes seriously both the limitations and the inherent dignity of our given nature

Metaphysics and Gender: The Normative Art of Nature and Its Human Imitations Michele

Schumacher,2023-03-07 The emergent science of transgenderism and related philosophies of gender propose a full scale inversion of the understanding of God man and the created order articulated in classical metaphysics undermining and parodying both the causality and ontology voiced by Genesis 1 27 God created man in His own image male and female He created them Whether through subversive performative identity or by surgical sex change the divinely made human person is now threatened with abolition and replacement by the self made man and the man made woman In *Metaphysics and Gender* Michele M Schumacher offers a corrective to this distorted and distorting outlook calling for the recovery of an anthropological vision rooted in recognition of the normative divine art of nature and of the likeness and far greater unlikeness between divine and human causality Surveying contemporary transgender trends Schumacher identifies and excavates their conceptual and ideological foundations in the gender theory of Judith Butler the existentialist feminism of Simone de Beauvoir and the atheistic existentialism of Jean Paul Sartre To the erroneous philosophical presuppositions of these thinkers Schumacher contrasts the metaphysically grounded thought of Aristotle and Thomas Aquinas advancing their positive account of the good of creation and of the meaning of ethical norms human freedom and natural inclinations and embodiment and mounting a timely and trenchant defense of the divinely created human person *Immortality in Harmony*
