Environmental Ethics, Ecological Theology, and Natural Selection Lisa Sideris,2003-07-16 In the last few decades religious and secular thinkers have tackled the world s escalating environmental crisis by attempting to develop an ecological ethic that is both scientifically accurate and free of human centered preconceptions This groundbreaking study shows that many of these environmental ethicists continue to model their positions on romantic pre Darwinian concepts that disregard the predatory and cruelly competitive realities of the natural world Examining the work of such influential thinkers as James Gustafson Sallie McFague Rosemary Radford Ruether John Cobb Peter Singer and Holmes Rolston Sideris proposes a more realistic ethic that combines evolutionary theory with theological insight advocates a minimally interventionist stance toward nature and values the processes over the products of the natural world *Environmental Ethics for the Long Term* John Nolt,2014-09-25 Broad in scope this introduction to environmental ethics considers both contemporary issues and the extent of humanity s responsibility for distant future life John Nolt a logician and environmental ethicist interweaves contemporary science logical analysis and ethical theory into the story of the expansion of ethics beyond the human species and into the far future Informed by contemporary environmental science the book deduces concrete policy recommendations from carefully justified ethical principles and ends with speculations concerning the deepest problems of environmental ethics Pedagogical features include chapter outlines annotated suggestions for further readings the explanations of key terms when first mentioned and an extensive glossary *Teaching Environmental Ethics* Clare Palmer,2006-04-01 This collection explores a variety of questions both of a theoretical and practical nature raised by teaching environmental ethics Questions considered move from asking whether teaching environmental ethics should include environmental advocacy to practical issues about texts syllabi and teaching techniques *Environmental Ethics and Process Thinking* Clare Palmer,1998 In this study Clare Palmer challenges the belief that the process thinking of writers like A N Whitehead and Charles Hartshorne has offered an unambiguously positive contribution to environmental ethics She compares process ethics to a variety of other forms of environmental ethics as well as deep ecology and reveals a number of difficulties associated with process thinking about the environment *Ecological Ethics* Patrick Curry,2006 Taking issue with the common assumption that human ethics can be extended to meet the demands of the ongoing ecological crisis Curry demonstrates that a new and truly ecological ethic is both possible and urgently needed **The Environment and Christian Ethics** Michael S. Northcott,1996-09-28 A new approach to environmental ethics from within the Christian tradition *Environmental Virtue Ethics* Philip Cafaro,Ronald Sandler,2005-02-04 There is one certainty regarding the human relationship with nature there is no getting away from it But while a relationship with nature is a given the nature of that relationship is not Environmental ethics is the attempt to determine how we ought and ought not relate to the natural environment A complete environmental ethic requires both an

ethic of action and an ethic of character Environmental virtue ethics is the area of environmental ethics concerned with character It has been an underappreciated and underdeveloped aspect of environmental ethics until now The selections in this collection consisting of ten original and four reprinted essays by leading scholars in the field discuss the role that virtue and character have traditionally played in environmental discourse and reflect upon the role that it should play in the future The selections also discuss the substantive content of the environmental virtues and vices and apply them to concrete environmental issues and problems This collection establishes the indispensability of environmental virtue ethics to environmental ethics It also enhances the breadth and quality of the ongoing discussion of environmental virtue and vice and the role they should play in an adequate environmental ethic *Character and Environment* Ronald L. Sandler, 2009-05-22

In *Character and Environment* Ronald L. Sandler brings together contemporary work on virtue ethics with contemporary work on environmental ethics He demonstrates the many ways that any ethic of character can and should be informed by environmental considerations He also develops a pluralistic virtue oriented environmental ethic that accommodates the richness and complexity of our relationship with the natural environment and provides effective and nuanced guidance on environmental issues
