protection against flood losses For decades the national response to flood disasters was generally limited to constructing flood control works such as dams levees seawalls and the like and providing disaster relief to flood victims This approach however did not reduce losses nor did it discourage unwise development In some instances it may have actually encouraged additional development To compound the problem due to its high risk and seasonal nature insurance companies were not able to provide affordable flood insurance coverage In light of mounting flood losses and escalating costs of disaster relief to the taxpayers the U S Congress created the NFIP The intent was to reduce future flood damage through community floodplain management ordinances and provide protection for property owners against potential losses through an insurance mechanism that requires a premium to be paid for the protection Questions and Answers: National Flood Insurance Program United States.
