- There are different hardware platforms;
- There are different operating systems;
- There are different network protocols;
- There are different application formats/protocols.

Evaluation and Comparison of CORBA (Object Request Broker) Implementations Roland Gelbmann, 2002-07 Diploma Thesis from the year 2002 in the subject Computer Science Software grade 1.0 Vienna University of Technology Informatik language English abstract Inhaltsangabe Abstract Common Object Request Broker Architecture CORBA a standard from the Object Management Group OMG defines a vendor independent architecture and infrastructure for distributed systems Further CORBA specifies a client server platform as well as an object oriented programming model for distributed computing The Object Request Broker ORB implements the part of CORBA which manages communication and data exchange between objects CORBA based applications often have to communicate with ORBs from different vendors Therefore testing the interoperability is one important point in this work Six actually available ORB implementations are shown and compared at given features If a problem has to be solved with CORBA it is necessary to choose the best ORB implementation for that purpose because they differ often at significant points Important details for decision are Standard Conformity Robustness Functionality as well as Functional Range or Interoperability Exactly these properties are to be examined in this work The investigation is performed on six at the web available ORBs indeed Jacorb 1.4 beta 2 Orbacus 4.1.0 Orbix E2A 2.0 OpenORB 1.2.0 J2SE ORB 1.4.0 as well as TAO 1.2.1 all in their most actual released version Additionally to these properties the correct implementation of the most important CORBA Services is checked They are Event Service Notification Service Name Service and Transaction Service The ORBs are compared at this given properties It shows that the ORBs differ very much from each other and that the CORBA Services are often implemented incorrectly Further a high costly implementation is no guarantee for best quality at all points The evaluation shows that a freely available ORB can be as good as or better than a commercial one Inhaltsverzeichnis
