

6 *Antropofagia*, primitivism and anti-primitivism

Rafael Cardoso

North Atlantic discussions of primitivism often take for granted that the concept operates in a single direction: outwards from Western Europe and North America towards the Southern Hemisphere.¹ The primitivist gaze is considered a projection of the colonizing self, simultaneously appropriating and subordinating the colonized other. That view of primitivism as a strictly ethnographic project, part and parcel of the larger colonial enterprise, has rightly been contested.² Such a binary understanding not only ignores the longer history of the idea but also obscures what Samuel Spinner has called “the primitivisms that flowered in the shadows of Europe’s empires”.³ The primitivism of the Celtic revival, Russian Neo-primitivism, Jewish primitivism, the so-called Black primitivism of the *Négritude* movement and the Harlem Renaissance: to differing degrees, these phenomena sought emancipation from hegemonic modernity by reversing the direction of the primitivist gaze towards the self.⁴

The preceding list of “eccentric primitivisms” can be expanded to include an example from Latin America: the avant-gardist anthropophagic movement (henceforth, *Antropofagia*) in 1920s Brazil.⁵ Latin American societies frequently blur the lines that divide elite from popular, colonizer from colonized, Western from non-Western, and such ambiguities and tensions are present in *Antropofagia*. Although the movement explicitly affirmed its opposition to European culture – and, indeed, employed the term “colonial mentality” in 1929 – its rhetorical strategies failed to gain a foothold outside the Europeanized elites it criticized and from which it drew its membership.⁶ The point of the present discussion is not to dismiss *Antropofagia*’s anti-colonialist credentials, but rather to situate its anti-primitivism as a means of working through the relationship between primitivism and coloniality.

Antropofagia needs to be contextualized within the broader dimension of Brazilian society in the 1920s. The First World War was a turning point in Latin American perceptions of the presumed cultural superiority of Europe. With Europeans engaged in mutual slaughter, the question was openly asked: who were the real barbarians? The war swelled a wave of nationalist self-affirmation in Brazil, surging with the creation of the National Defence League in 1916, championed by poet Olavo Bilac, and cresting around the centennial of independence from Portugal in 1922. The task of affirming a new national conscience was explicitly taken up in 1916 by the *Revista do Brasil*, an influential cultural magazine in São Paulo that shaped the outlook of the young artists and intellectuals who burst onto the scene with the Modern Art Week, in 1922.⁷

Beneath the shining surface of nationalism lay a powerful undercurrent of anxiety about identity. At a time when the notion of *brasilidade* was in its infancy, ideas of Brazilian culture remained far from unified.⁸ Huge waves of immigration from Europe, Asia, and the Middle East, between the 1890s and 1910s, altered demographics and provoked apprehensions that the nation was losing its ethnic cohesion. In parallel, the struggles of Afro-descendant peoples to claim their rightful place within a society in which slavery was still a living memory cannot be dissociated
