

INDEPENDENT PRACTICE

Independent practice occurs when the teacher has demonstrated a task or process and then gives students the opportunity to practice on their own.

DEFINITION

In the independent practice model, the teacher first provides direct instruction, followed by allowing time for independent practice by the students.

There are many variations of this method (e.g. guided practice) that integrate strong teacher support and a transition to student-centered active learning.

EXAMPLE

- Mr. Johnson shows his students how to use a Venn Diagram using two animals as an example. He then lets his students try using their own worksheets.
- Hannah has an upcoming exam at university so she spends 1.5 hours per day at the library doing exams from previous years.
