*Data Mining: Foundations and Practice* Tsau Young Lin, Ying Xie, Anita Wasilewska, Churn-Jung Liau, 2008-08-20. The IEEE ICDM 2004 workshop on the Foundation of Data Mining and the IEEE ICDM 2005 workshop on the Foundation of Semantic Oriented Data and Web Mining focused on topics ranging from the foundations of data mining to new data mining paradigms. The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimulating new data mining research directions. We feel that the papers presented at these workshops may encourage the study of data mining as a scientific field and spark new communications and collaborations between researchers and practitioners. To express the visions forged in the workshops to a wider range of data mining researchers and practitioners and foster active participation in the study of foundations of data mining, we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions. The content of this book includes studies of foundations of data mining from theoretical, practical, algorithmical, and managerial perspectives. The following is a brief summary of the papers contained in this book.

*Privacy-Preserving Data Mining* Charu C. Aggarwal, Philip S. Yu, 2008-06-10. Advances in hardware technology have increased the capability to store and record personal data about consumers and individuals, causing concerns that personal data may be used for a variety of intrusive or malicious purposes. *Privacy Preserving Data Mining Models and Algorithms* proposes a number of techniques to perform the data mining tasks in a privacy preserving way. These techniques generally fall into the following categories: data modification techniques, cryptographic methods and protocols for data sharing, statistical techniques for disclosure and inference control, query auditing methods, randomization and perturbation based techniques. This edited volume contains surveys by distinguished

researchers in the privacy field Each survey includes the key research content as well as future research directions Privacy Preserving Data Mining Models and Algorithms is designed for researchers professors and advanced level students in computer science and is also suitable for industry practitioners *Secure Data Management* Willem Jonker,2005-08-25 This book constitutes the refereed proceedings of the Second VLDB 2005 International Workshop on Secure Data Management SDM 2005 held in Trondheim Norway in August September 2005 in conjunction with VLDB 2005 The 16 revised full papers presented were carefully reviewed and selected from 38 submissions The papers are organized in topical sections on encrypted data access access control information disclosure control in databases privacy and security support for distributed applications and with a special focus on security and privacy in healthcare *Artificial Intelligence and Computational Intelligence* Fu Lee Wang,Hepu Deng,Jingsheng Lei,2010-10-08 This two volume proceedings contains revised selected papers from the International Conference on Artificial Intelligence and Computational Intelligence AICI 2010 held in Sanya China in October 2010 The total of 105 high quality papers presented were carefully reviewed and selected from 1216 submissions The topics covered are applications of artificial intelligence automated problem solving automatic programming data mining and knowledge discovering distributed AI and agents expert and decision support systems fuzzy logic and soft computing intelligent information fusion intelligent scheduling intelligent signal processing machine learning machine vision multi agent systems natural language processing neural networks pattern recognition robotics applications of computational intelligence biomedical informatics and computation fuzzy computation genetic algorithms immune computation information security intelligent agents and systems nature computation VLDB particle swarm optimization and probabilistic reasoning
