4D Hyperlocal Lucy Bullivant, 2017-03-13 4D Hyperlocal A Cultural Tool Kit for the Open source City The evolution of digital tools is revolutionising urban design planning and community engagement This is enabling a new hyperlocal mode of design made possible by geolocation technologies and GPS enabled mobile devices that support connectivity through open source applications Real time analysis of environments and individuals input and feedback bring a new immediacy and responsiveness Established linear design methods are being replaced by adaptable mapping processes real time data streams and experiential means fostering more dynamic spatial analysis and public feedback This shifts the emphasis in urban design from the creation of objects and spaces to collaboration with users and from centralised to distributed participatory systems Hyperlocal tools foster dynamic relational spatial analysis making their deployment in urban and rural contexts challenged by
