

## 7 Ways To Give Your Pension A Boost

The year 2008 was not good. The year in question saw the start of the world financial crisis. In that year, the value of private pension funds was reduced by £3.3 TRILLION.

State pension funds were under intense strain as well, notably in the west.

The idea that pensions are a secure [investment course](#) vehicle began to be called into doubt. In reality, despite a number of government safety measures in place with the Financial Conduct Authority (FCA) and Financial Services Compensation System, the UK's state pension scheme was criticised as being "not fit for purpose" fourteen years after the pension shock of 2008. (FSCS).

Even worse, many people are forced to use their pensions to cover living costs. Up to 6 million UK investors were formerly thought to be at risk of losing £15,000 by the time they retired and began drawing on their pensions.

In the past, consumers could simply trust the government or their preferred financial institution to manage their pensions.

That's not the situation anymore.

Will my pension be sufficient to support me each year once I retire? is a concern for many.
