Ziskind8217s Internal Family Systems Therapy: New Dimensions quickly established itself as essential reading for clinicians who are interested in IFS by illustrating how the model can be applied to a variety of therapy modalities and patient populations. Sweezy and Ziskind8217s newest volume, Innovations and Elaborations in Internal Family Systems Therapy, is the natural follow-up to that text. Here Richard Schwartz and other master IFS clinicians illustrate how they work with a wide variety of problems: racism, perpetrator parts, trauma, addiction, eating disorders, parenting, and grief. The authors also show creative ways of putting into practice basic IFS techniques that help parts to unblend and to unburden both personal and legacy burdens.

Creativity and Innovation Simona Doboli,Jared B. Kenworthy,Ali A. Minai,Paul B. Paulus,2022-01-01 This book focuses on the emergence of creative ideas from cognitive and social dynamics In particular it presents data models and analytical methods grounded in a network dynamics approach It has long been hypothesized that innovation arises from a recombination of older ideas and concepts but this has been studied primarily at an abstract level In this book we consider the networks underlying innovation from the brain networks supporting semantic cognition to human networks such as brainstorming groups or individuals interacting through social networks and relate the emergence of ideas to the structure and dynamics of these networks Methods described include experimental studies with human participants mathematical evaluation of novelty from group brainstorming experiments neurodynamical modeling of conceptual combination and multi agent modeling of collective creativity The main distinctive features of this book are the breadth of perspectives considered the integration of experiments with theory and a focus on the combinatorial emergence of ideas
