Miller, 2017-11-22 Excerpt from *The Construction and Flying of Kites* It takes the wind to make the kite go Just how they don't quite know Without going too deeply into the physics of the various problems of kite construction the consideration of a few of the simpler ones may not be out of place If a boy undertakes to y a tightly stretched plain surface kite he will soon find he has about as foxy a problem as he wants to tackle He will soon discover that he needs ballast but the ballast needed is not mere weight A piece of lead suspended to a string will not answer the purpose will not give poise to a darting kite It finds its vertical position too quickly If we had a very steady breeze we might work out the right attachment of bridle and add just the right ballast here and there to make a partial success but we must consider cross currents whirls and calms and all such disturbances that a boy encounters in all kite ying The boys use a tissue paper tail for ballast The tail steadies the kite not so much by its actual weight as by the pull due to the resistance it offers in being drawn through the air It takes much longer for a tail of this kind to drop to its normal position and is a constant balancer during that time being sufficient to carry the kite through a temporary disturbance or to the adjustment of a contrary breeze It is the same principle as the one employed by the rope walkers who poise themselves by the use of fans So much for kites with tails About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are
