Value focuses on the ways in which museums and the use of their collections have contributed to and continue to be engaged
with value creation processes Including chapters from many of the leading figures in museum anthropology as well as from
outstanding early career researchers this volume presents a diverse range of international case studies that bridge the gap
between theory and practice It demonstrates that ethnographic collections and the museums that hold and curate them have
played a central role in the value creation processes that have changed attitudes to cultural differences The essays engage
richly with many of the important issues of contemporary museum discourse and practice They show how collections exist at
the ever changing point of articulation between the source communities and the people and cultures of the museum and
challenge presentist critiques of museums that position them as locked into the time that they emerged *Museums Societies*
and the Creation of Value provides examples of the productive outcomes of collaborative work and relationships showing how
they can be mutually beneficial The book will be of great interest to researchers and students engaged in the study of
museums and heritage anthropology culture Indigenous peoples postcolonialism history and sociology It will also be of
interest to museum professionals **Annals of Archaeology and Anthropology** ,1930 The Geographical Journal ,1930

Indigenous Knowledge and Ethnomathematics Eric Vandendriessche,Rik Pinxten,2023-02-14 The book presents a series
of ethnographic studies which illustrate issues of wider importance such as the role of cultural traditions concepts and
learning procedures in the development of formal or mathematical thinking outside of the western tradition It focuses on
research at the crossroads of anthropology and ethnomathematics to document indigenous mathematical knowledge and its
inclusion in specific cultural patterns More generally the book demonstrates the heuristic value of crossing ethnographical
anthropological and ethnomathematical approaches to highlight and analyze or formalize with a pedagogical outlook
indigenous mathematical knowledge The book is divided into three parts The first part extensively analyzes theoretical claims
using particular ethnographic data while revealing the structural mathematical features of different ludic graphic or
technical procedural practices in their links to other cultural phenomena In the second part new empirical studies that add
data and perspectives from the body of studies on indigenous knowledge systems to the ongoing discussions in mathematics
education in and for diverse cultural traditions are presented This part considers on the one hand the Brazilian work in this
field on the other hand it brings ethnographic innovation from other parts of the world The third part comprises a broad

philosophical discussion of the impact of intuitive or ontological premises on mathematical thinking and education in the light of recent developments within so called indigenously inspired thinking Finally the editors conclusions aim to invite the broad and diversified field of scholars in this domain of research to seek alternative approaches for understanding mathematical reasoning and the adjacent adequate educational goals and means This book is of interest to scholars and students in anthropology ethnomathematics history and philosophy of science mathematics and mathematics education as well as other individuals interested in these topics *Annals of Archaeology and Anthropology* Sir John Linton Myres,Percy Edward Newberry,Thomas Eric Peet,John Percival Droop,1930 **Photography, Anthropology and History** Elizabeth Edwards,2016-04-22 Photography Anthropology and History examines the complex historical relationship between photography and anthropology and in particular the strong emergence of the contemporary relevance of historical images Thematically organized and focusing on the visual practices developed within anthropology as a discipline this book brings together a range of contemporary and methodologically innovative approaches to the historical image within anthropology Importantly it also demonstrates the ongoing relevance of both the historical image and the notion of the archive to recent anthropological thought As current research rethinks the relationship between photography and anthropology this volume will serve as a stimulus to this new phase of research as an essential text and methodological reference point in any course that addresses the relationship between anthropology and visuality "Propalladia" and Other Works of Bartolome de Torres Naharro, Volume 4 Joseph E.
