Eco-Homes Doctor Jenny Pickerill,2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us

Utopian Studies ,1994 What Does Green Mean? James GS Marshall,2019 Canadians have seen Liberal governments They ve seen Conservative governments And they ve seen New Democrat governments But as of 2019 they still have yet to see a Green government Around the rest of the world however Green Parties have formed governments many times In many countries they have been an established part of the political domain for decades And they re not seen as a single issue party as they re so often wrongly described in Canada What Does Green Mean is a world tour of Green parties and Green political ideas Using international examples of Green parties from around the globe it explores what the Greens are trying to do for politics and for the planet From Green governments in Germany Sweden and Ireland to the individuals who founded the Canadian Green movement the book aims to leave the reader with a richer understanding of what Green truly means

The Radicalism Handbook John Button,1995 After an introductory essay the book is divided into two main sections Biographies and Groups and Movements 38 forerunners crucial to 20th century radicalism are included and then profiles of 350 twentieth century radicals are featured Groups and Movements describes organizations cultural and political movements events and campaigns that have had a marked impact on the development of radical ideas and tactics

Organic Farming and

the Socioecological Imaginary Tim P. Vos, 2007 *The Encyclopedic Sourcebook of New Age Religions* James R. Lewis, 2004 In the late 1980s the New Age movement became the focus of both media attention and widespread ridicule as some of the more outlandish aspects of the movement such as channeling and the use of crystals for healing briefly piqued the public's curiosity While the movement was at its height scholars of religion generally sneered at what was perceived to be a daffy shallow craze and ignored it as a subject of serious study Professor James R Lewis was among the first to examine this growing religious phenomenon scientifically In previous books he has investigated the New Age as the most visible manifestation of a significant spiritual subculture the roots of which reach back to Theosophy Spiritualism and New Thought The present collection pursues this theme bringing together some of the best recent scholarship on new religions Since the height of its popular influence the New Age has declined in strength but has given rise to a plethora of new denominations all shaped by New Age ideas and spirituality Reflecting the emergence of this new denominational structure the core chapters of this book focus on specific groups Other chapters examine the movement's historical roots A unique feature of Dr Lewis's work is his inclusion of extensive selections from New Age literature thus allowing readers to experience firsthand the unusual perspectives of the various groups This is a fascinating examination of a significant and persistent religious and social phenomenon

Built Environment, 1991 *Environment and Planning*, 2007 International interdisciplinary journal discussing the relations between Society and Space Space is broadly conceived from landscapes of the body to global geographies from cyberspace to old growth forests as metaphorical and material as theoretical construct and empirical fact Covers both practical politics and the abstractions of social theory *Eurotopia*, 2000

America's Communal Utopias Donald E. Pitzer, 1997 Offering the first comprehensive history of Atlanta race relations Ronald Bayor discusses the impact of racial bias on physical and institutional development of the city from the end of the Civil War through the mayorship of Andrew Young in the 1980s Bayor explores frequently ignored policy issues through the lens of race including hospital care highway placement and development police and fire services schools and park use as well as housing patterns and employment

Envisioning Ecotopia Kenn Kassman, 1997-10-28 How do various worldviews praxis orientations and preferred future visions differ between the three major subcultures within the American Green Movement Drawing on his experience as an activist Kenn Kassman explains the distinctions between the three elements which he terms Neo Primitivism Mystical Deep Ecology and Social Ecology What emerges is a perceptive

analysis of one of the most important of North America's new social movements the Greens Kassman examines and contradistinguishes the approach of each element in the movement to the general Green agenda ecological harmony social justice societal participation and nonviolence and goes on to explore potential weaknesses in the utopias they seek The study concludes with the author's considered view of the likely progress and development of the three components in the future He asks and suggests an answer to the question what ultimately will be regarded as the political and social significance of the Green movement Kassman's work will be of interest to scholars students and activists in politics and environmental studies
