Communicating in Community Franz-Josef Eilers, 1994 *Communication in Modern Social Ordering* Kai Eriksson, 2011-07-21 *Communication in Modern Social Ordering* investigates the modern history of communication in relation to the thinking of the political community in the United States By illustrating the intertwining of the technological developments in communication methods and its community building effects the different representations of society and their political implications are examined against the development of communication systems from the telegraph to the telephone to computer networks It was the telegraph that made communication a continual process thus freeing it from the rhythmical motion of the postal service and from physical transportation in general and provided both a model and a mechanism of control Using the theories of both Foucault and Heidegger to provide a lens for new investigation the author studies not the meanings of communication and its logic as such but rather the conditions and structures that allow meanings and logic to be formulated in the first place The book offers an original combination of historical analysis with an ontological discussion of the evolution of telecommunications in the U S as a phenomenon of modern social ordering **Social Media** Christian Fuchs, 2024-11-01 You will never look at social media the same way again Social media are an integral part of contemporary society From news warfare politics advertising consumption entertainment friendships labour and economy to friendships leisure language and everyday life they have changed the way we communicate use information and understand the world Social media shape and are shaped by contemporary society In order to understand contemporary society we have to ask critical questions about social media This book is the ultimate guide for digging deeper into issues of ownership power class and in justice This book equips you with a critical understanding of the complexities and contradictions at the heart of social media s relationship with society The Fourth Edition contains new chapters and has updated and revised versions of other chapters The book includes a new chapter on TikTok in the context of global capitalism and the geopolitical conflict between China and the USA It explores new topics such as information and social media warfare in the context of Russia s invasion of Ukraine the implications of Elon Musk s acquisition of Twitter for democracy and the public sphere the prospects of Twitter alternative Mastodon digital fascism influencers and the attention economy on TikTok digital capitalism the role of big data in digital capitalism The Public Service Media and Public Service Internet Manifesto social media s digital alienation and Putinism and information warfare It explores populism racism nationalism militant patriarchy in a chapter on right wing authoritarianism on social media that includes two case studies of Donald Trump and Putinism It analyses the phenomenon of social media influencers in the age of TikTok Instagram YouTube and Snapchat It explains in an updated chapter what digital capitalism is and what role big data plays in it It explores the growing prominence of platforms and platform capitalism It analyses fake news misinformation and surveillance capitalism in the context of Facebook WhatsApp Cambridge Analytica and the Internet Research Agency It shows why Google is simultaneously the Internet s God and Satan It discusses digital
