Proceedings of the Institute of International Relations Institute of International Relations,1927 *Infrastructure Communication in International Relations* Carolijn van Noort,2020-11-09 This book demonstrates how infrastructure projects and the communications thereof are strategized by rising powers to envision progress to enhance the actor s international identity and to substantiate and leverage the actor s vision of international order While the physical aspects of infrastructure are important infrastructure communication in international relations demands more scholarly attention Using a case study approach Carolijn van Noort examines how rising powers communicate about infrastructure internationally and discusses the significance of these communication practices The four case studies include BRICS s summit communications about infrastructure Brazil s infrastructure promises to Africa China s communication of the Belt and Road Initiative in East Africa and Kazakhstan s news media coverage of China s Belt and Road Initiative Van Noort highlights the fact that the link between infrastructure identity and order making is arbitrary and thus contested in practice with rising powers operationalizing infrastructure communication in international relations in varied ways She argues that both communication organization and the visibility of strategic narratives on infrastructure influence the international communication of infrastructure vision and action plans with different levels of success *Infrastructure Communication in International Relations* is a welcome and timely book of interest to students and scholars in the fields of international relations global communications and the politics of infrastructure **Communication and Conflict** S. K. Desai,2011 *The International Politics of Communication* Alan Chong,2025-03-18 In an era of globalization international communication constantly takes place across borders defying sovereign control as it influences opinion While diplomacy between states is the visible face of international relations this informal diplomacy is usually less visible but no less powerful Information politics can be found in propaganda Internet politics educational exchanges tourism and even popular film *The International Politics of Communication* examines this informational dimension of international politics investigating how information is generated conveyed through channels and directed specifically at audiences While citizens are often portrayed as faithfully loyal supporters and beneficiaries of the modern nation state a fiction supported by passports identification papers and other notarized credentials they are subject to the pulls of loyalty from transnational tribal affiliations mythological and historical narratives of ethnicity as well as the transcendental claims of religion and philosophy Increasingly social media also enchants non state individuals providing new virtual communities as the center of loyalties rather than national affiliations By
