Communications and History Paul Heyer, 1988 This innovative volume selectively assesses three centuries of inquiry into the role of communications in the history of civilization It challenges the conventional assumption that inquiry into the human consequences of living in a communications dominated age began in the middle of the twentieth century as a response to omnipresent technology Beginning with the eighteenth century Enlightenment Heyer shows how scholars as well known as Rousseau and as obscure as Monboddo were concerned with the historical dimension of aspects of social communication Heyer approaches his subject as a problem in intellectual history and social thought includes major twentieth century thinkers who deal with the communications history question and concludes his study with an appraisal of the work of several contemporary researchers who have attempted detailed studies of specific media or historical periods

Communication in History, 1992 **Speaking into the Air** John Durham Peters, 2012-04-26 Communication plays a vital and unique role in society often blamed for problems when it breaks down and at the same time heralded as a panacea for human relations A sweeping history of communication *Speaking Into the Air* illuminates our expectations of communication as both historically specific and a fundamental knot in Western thought This is a most interesting and thought provoking book Peters maintains that communication is ultimately unthinkable apart from the task of establishing a kingdom in which people can live together peacefully Given our condition as mortals communication remains not primarily a problem of technology but of power ethics and art Antony Anderson *New Scientist* Guaranteed to alter your thinking about communication Original erudite and beautifully written this book is a gem *Kirkus Reviews* Peters writes to reclaim the notion of authenticity in a media saturated world It is this ultimate concern that renders his book a brave colorful exploration of the hydra headed problems presented by a rapid fire popular culture *Publishers Weekly* What we have here is a failure to communicate book Funny thing is it communicates beautifully *Speaking Into the Air* delivers what superb serious books always do hours of intellectual challenge as one absorbs the gradually unfolding vision of an erudite creative author Carlin Romano *Philadelphia Inquirer* *Theorizing Communication* Dan Schiller, 1996 This is the first book to offer a detailed intellectual history of communication study over the last century Schiller looks at the relationship between early

communication theory and contextualizing social and economic changes and finds that the evolving dualism between intellectual and manual labor became deeply embedded in the work of theorists even into our own time Close attention is paid to leading thinkers in the field including John Dewey C Wright Mills Raymond Williams Stuart Hall and Daniel Bell

Stevens, Hazel Dicken Garcia, 1980-04-01 The history of communication is a new subject in mass communication and journalism curricula one for which there has been only scattered published research and no adequate text Communication History attempts to remedy both of these problems by providing a challenging new approach to the study of communication over time Moving away from a tradition that focuses merely on major communication personalities or institutions the authors instead encourage the reader to see the interrelated processes by which information is diffused The authors utilize social science concepts and techniques to enlarge and enrich our understanding of communication in historical perspective *International Communication History*, 2002 *The International History of Communication Study* Peter Simonson, David W. Park, 2015-10-14 The International History of Communication Study maps the growth of media and communication studies around the world Drawing out transnational flows of ideas institutions publications and people it offers the most comprehensive picture to date of the global history of communication research and education This volume reaches into national and regional areas that have not received much attention in the scholarship until now including Asia Latin America Africa and the Middle East alongside Europe and North America It also covers communication study outside of academic settings in international organizations like UNESCO and among commercial and civic groups It moves beyond the traditional canon to cover work by forgotten figures including women scholars in the field and those outside of the United

States and Europe and it situates them all within the broader geopolitical institutional and intellectual landscapes that have shaped communication study globally. Intended for scholars and graduate students in communication media studies and journalism, this volume pushes the history of communication study in new directions by taking an aggressively international and comparative perspective on the historiography of the field. Methodologically and conceptually, the volume breaks new ground in bringing comparative transnational and global frames to bear and puts under the spotlight what has heretofore only lingered in the penumbra of the history of communication study.
