Communist Legislatures In Comparative Perspective:

Communist Legislatures in Comparative Perspective Daniel N. Nelson, Stephen White, 1982-06-18

Post-Communist and Post-Soviet Parliaments Philip Norton, David M. Olson, 2013-09-13 The sudden collapse of communism stimulated both the rapid emergence of fledgling democracies and scholarly attention to the post communist transition. These newly democratized parliaments have been described as parliaments in adolescence. This book identifies six parliaments which exemplify the wide range of developments in the new post communist political systems from the stable consolidated democracies to the less stable and more authoritarian states within which their respective parliaments function. Finally, the post communist parliaments are compared with the presumptively more established west European parliaments. This book bridges the usual gap in research between the post communist parliaments and more normal democratic parliaments to develop a common legislative research perspective on both new and established parliaments. This book was previously published as a special issue of the *Journal of Legislative Studies*.

Democratic Legislative Institutions: A Comparative View David M. Olson, 2015-02-24 This text summarizes the research on and experiences of democratic legislatures around the world. It focuses on what legislatures are and what they do as both consequence of and contributor to democratic self government.

Post-Communist Parliaments David M. Olson, Gabriella Ilonszki, 2013-10-18 At the end of the founding or initial decade the new parliaments of post Communist Europe had developed two distinct types: democratic and presidentially dominated. Whilst in the early years they had been characterised as parliaments in adolescence, they have through the second decade continued to improvise but also elaborate their working relationships with both their chief executives and electorates. This book examines these adaptations in seven parliaments, comparing both among them and with parliaments of west Europe. Their changes are traced through four distinct sets in context: members, internal structure and working relationship with the executive. This research develops a common perspective for our understanding of both new and developed legislatures by tracing the steps through which new parliaments begin to adapt and become established. This book was published as a special issue of *Journal of Legislative Studies*.

The New Parliaments of Central and Eastern Europe Philip Norton, David M. Olson, 2013-11-05 What role have parliaments played in the dramatic changes occurring in Eastern and Central Europe? Adopting a common research framework, the contributors analyse in detail the role and operations of parliaments in ten of the new democracies. They focus on what determines their capacity to have some impact on public policy. They identify the significance of parliaments operating in often hybrid systems of government with the relationship between the executive and legislature not well defined and with an absence of constraining influence that typify western political systems.

Working Papers on Comparative Legislative Studies Lawrence D. Longley, 1994

Legislative Decline in the 21st Century Irina Khmelko, Rick Stapenhurst, Michael L. Mezey, 2020-01-24 Irina Khmelko, Frederick Stapenhurst and Michael L. Mezey have assembled an authoritative guide to the declining institutional capacities of legislatures around

the world Case studies represent a diverse sample of countries ranging from newer democracies emerging from the post communist world to more established but at times fragile democracies in Asia Although largely focused on newer democratic systems readers will be able to identify key factors that explain the general global trend toward the empowerment of executives at the expense of national legislatures The cases although different from one another identify several factors that have explained the erosion of legislative power including historical legacies institutional design economic factors external factors political polarization personalization of politics and the rise of populism Original data and the presentation of testable theoretical propositions about the growing imbalance between executives and national legislatures moves the field in a promising new direction Legislative Decline in the 21st Century will be of interest to students and scholars of Legislative Studies and Comparative Politics Lessons drawn from these case studies will allow policy makers to explore new solutions that can lead to the improved quality of democracy in countries around the world
