Community Of Knowledge:

Knowledge and Communities Eric L. Lesser, Michael A. Fontaine, Jason A. Slusher, 2000 This is a compendium of articles that focus on how communities can be viewed from an organizational context and how organizations are using communities to leverage external stakeholders such as customers and suppliers

Knowledge at Work Robert Defillippi, Michael Arthur, Valerie Lindsay, 2009-02-04 This book's unique perspective stems from its knowledge diamond framework to examine how individuals, communities, organizations, and host industries reciprocally influence each other in the course of knowledge work. This highly topical book focuses on work-based projects as a focus for organizational learning. Establishes the link between individual, community, organization, and industry learning. Suggests that organizations need to recognize and understand this link if they are to capitalize on project-based learning. Incorporates material on project-based learning in virtual communities. Refers to different examples such as the film industry, the software industry, and the boat building industry. Includes end-of-chapter questions provoking reflection and discussion.

Seasonality of malnutrition: Community knowledge on patterns and causes of undernutrition in children and women in Laisamis, Marsabit County, Kenya Food and Agriculture Organization of the United Nations, United Nations International Children's Emergency Fund, Washington State University, 2020-12-28 This report presents findings from a community participatory study conducted to determine the seasonality of malnutrition and factors associated with malnutrition among children and women in Laisamis subcounty, Marsabit County. The study was conducted as part of the Livestock for Health L4H project. This project investigates the cost effectiveness of livestock feeding and nutritional counselling during critical dry periods in reducing the risk of acute malnutrition in children below 5 years of age and in pregnant and lactating women PLW. The L4H project is based on the observed patterns of increased acute malnutrition associated with decreased milk consumption among women and children in pastoralist communities. The study used a mixed methods approach to collect data from the two main communities, Rendille and Samburu, residing in Laisamis subcounty. The aim of the study was to understand the communities' livelihood patterns and strategies, the observed temporal patterns of acute malnutrition in children and women, the factors determining the malnutrition patterns, and communities' perspectives on practices and programming used to minimize malnutrition in the community. The report outlines the key findings from the three data collection methods used: key informant interviews, focus group discussions, and participatory epidemiology methods, and gathering information from men and women from each of the two communities separately.
