Commutative Semigroup Rings:

Commutative Semigroup Rings Robert Gilmer, 1984-03-15 Commutative Semigroup Rings was the first exposition of the basic properties of semigroup rings Gilmer concentrates on the interplay between semigroups and rings thereby illuminating both of these important concepts in modern algebra [Group and Semigroup Rings](#) G. Karpilovsky, 2011-09-22 A broad range of topics is covered here including commutative monoid rings the Jacobson radical of semigroup rings blocks of modular group algebras nilpotency index of the radical of group algebras the isomorphism problem for group rings inverse semigroup algebras and the Picard group of an abelian group ring The survey lectures provide an up to date account of the current state of the subject and form a comprehensive introduction for intending researchers *Commutative Semigroup Rings*, 2006 **Zero Divisors in Commutative Semigroup Rings** Billy Don Janeway, 1981 **A Description of the Jacobson Radical of Semigroup Rings of Commutative Semigroups** E. Jespers, P. Wauters, 1986 [The Brown-McCoy radical of semigroup rings of commutative cancellative semigroups](#) Eric Jespers, Jan Krempa, P. Wauters, 1984 [Semigroup Algebras](#) Okninski, 2020-08-26 Gathers and unifies the results of the theory of noncommutative semigroup rings primarily drawing on the literature of the last 10 years and including several new results Okninski Warsaw U Poland restricts coverage to the ring theoretical properties for which a systematic treatment is current **The Group of Units of a Commutative Semigroup Ring of a Torsion-free Semigroup** E. Jespers, 1986 **The Algebra of a Commutative Semigroup Over a Commutative Ring with Unity** W. D. Munn, 1983 **Numerical Semigroups** Jürgen Herzog, Somayeh Moradi, Masoomeh Rahimbeigi, 2025-11-13 This book offers an exploration of the rich interplay between numerical semigroups and commutative algebra It fills a notable gap in the literature by bridging numerical semigroup theory with advanced algebraic methods The book is structured to support both self study and advanced coursework and it is divided into two major parts The first three chapters lay the algebraic groundwork for later applications to numerical semigroups They introduce readers to foundational topics in commutative algebra homological methods Cohen Macaulay and canonical modules all with a focus on the graded structures that arise naturally in semigroup rings Building on the first three chapters Chapters 4 6 lead to deep results connecting semigroup properties and invariants to algebraic properties and homological data of semigroup rings Throughout the exposition is enriched with illustrative examples detailed proofs and exercises to reinforce understanding The book is designed for graduate students in mathematics as well as researchers in algebra number theory and combinatorics **Arithmetical Properties of Commutative Rings and Monoids** Scott T. Chapman, 2005-03-01 The study of nonunique factorizations of elements into irreducible elements in commutative rings and monoids has emerged as an independent area of research only over the last 30 years and has enjoyed a recent flurry of activity and advancement This book presents the proceedings of two recent meetings that gathered key researchers from around the world **The Brown-McCoy Radical of Semigroup Rings of Commutative Cancellative Semigroups** Eric

Jespers, J., Krempa, P., Wauters, 1984 *The Jacobson Radical of Classical Rings* Gregory Karpilovsky, 1991 This book aims to provide comprehensive coverage of the structure of the Jacobson radical of classical rings. Special attention is drawn to the discoveries concerning the Jacobson radical of graded rings. The main objective has been to present an accessible self-contained and detailed coverage of the present state of the subject so that the reader can find in one place all that is needed for a thorough understanding of the main results along with concrete information on how the ideas are applied. Cogroups and Co-rings in Categories of Associative Rings George M. Bergman, Adam O. Hausknecht, 1996 This book studies representable functors among well known varieties of algebras. All such functors from associative rings over a fixed ring R to each of the categories of abelian groups, associative rings, Lie rings and to several others are determined. Results are also obtained on representable functors on varieties of groups, semigroups, commutative rings and Lie algebras. The book includes a Symbol index which serves as a glossary of symbols used and a list of the pages where the topics so symbolized are treated and a Word and phrase index. The authors have strived and succeeded in creating a volume that is very user friendly.

Proceedings of the 1984 Marquette Conference on Semigroups Karl E. Byleen, Peter Rodney Jones, Francis J. Pastijn, 1985 **Unit Groups of Classical Rings** Gregory Karpilovsky, 1988 The purpose of this book is to give a self-contained up to date account of the structure of unit groups of classical rings. In so doing the work draws together four areas of mathematics: ring theory, group theory, group representation theory and algebraic number theory. The ensuing interplay between these disciplines provides a unique source of enrichment for each of them. The main theme centers on two related problems: to determine the isomorphism class of the unit group $U(R)$ of ring R in terms of natural invariants associated with R and to find an effective method for the construction of units of ring R . Various threads of the development are tied together to convey a comprehensive picture of the current state of the subject. Examples are provided to help research workers who need to compute explicitly unit groups of certain rings. A familiarity with basic ring theoretic and group theoretic concepts is assumed but a chapter on algebraic preliminaries is included. The text is distinguished by its very clear exposition. **The Jacobson Radical of Semigroup Rings of Commutative Cancellative Semigroups** Eric Jespers, Edmund R. Puczyłowski, 1983 **Pacific Journal of Mathematics**, 1982-05 **Free Rings and Their Relations** Paul Moritz Cohn, 1971 **CMUC**, 1997
