Compact Living:

Compact Living Michael Guerra,2013 Compact Living opens our eyes to the possibilities of living a sustainable low impact life It offers a powerful perspective to anyone wishing to live more simply with less debt yet more freedom It is the perfect antidote to chasing the ideal of a bigger more stressful lifestyle This inspiring book is a collection of design solutions for small spaces providing useful basic tools for organising an entire house and garden It shows us how to make the most of what we already have around us and how to future proof for change to suit our needs COVER [Compact Living - Maximizing Your Limited House Space](#) Philcar Faunillan,John Davidson,2015-05-07 Table of Contents Introduction Chapter 1 Changing the Way We Think About Compact Houses Benefits of Compact Living Global Impact of Compact Living Chapter 2 Compact Living Basic Design Principles Chapter 3 Compact Living 101 Maximizing Floor Spaces Choosing Your Furniture Wisely Creating the Most Out of Your Space Conclusion Author Bio Publisher Introduction All over the world especially in Europe there has been a growing movement to promote compact cities Compact cities are cities wherein the supermarkets offices hospitals and other important places are set around one area Through urban planning compact cities are created in order to reduce the space used to minimize emissions from extensive car use and to preserve more rural areas and green spaces This movement acknowledges the fact that the world more than ever is in need of space Our population is continually growing far beyond seven billion and yet the Earth in its finiteness remains the same Of all the infrastructures that have to use the Earth's space the largest portion comes not from the industries but from our residential homes apartment buildings and condominiums our living spaces In the United States the houses get bigger each year It was just less than 1700 sq ft in the 1970s and has now gone up to 2500 sq ft in 2014 What's ironic here is that the families today are smaller than in the 1970s In the United Kingdom meanwhile the average one bedroom house is merely 495 sq ft or 46 sq m and even a three bedroom home is just 947 sq ft on average Yes there is a huge gap between the US and the UK's average housing spaces but believe it or not there are many more countries with less and less square footage and yet survey shows that these people are not less satisfied What I am trying to say is that space is merely a matter of how you use it Let me ask how many rooms in your house are not used that it ended up being a storage cabinet Or how many useless things or non working appliances do you have in your kitchen that you don't dispose just because you don't want your cabinets to look empty There are probably many of you who have these unused spaces in your homes The thing is you could've grown vegetables with that space it could've saved you dollars or it could've been use for something else With the growing movement for compact cities and the rising of global awareness on sustainability issues it is time for us to rethink how much square footage we really need in our homes This is what compact living is all about it is maximizing your limited house space for you to create more living spaces that you never imagined existing in your small home [Tiny Homes](#) Blythe Mallory,2024-10-08 Tiny Homes explores the growing architectural and lifestyle trend of compact living spaces challenging conventional notions of housing and
