Artificial Intelligence David L. Poole,Alan K. Mackworth,2023-07-13 A comprehensive learning resource for undergraduate and graduate students with new chapters on deep learning causality and social impact **Leveraging Artificial Intelligence in Global Epidemics** Le Gruenwald,Sarika Jain,Sven Groppe,2021-07-28 Leveraging Artificial Intelligence in Global Epidemics provides readers with a detailed technical description of the role Artificial Intelligence plays in various stages of a disease outbreak using COVID 19 as a case study In the fight against epidemics medical staff are on the front line but behind the lines the battle is fought by researchers and data scientists Artificial Intelligence has been helping researchers with computer modeling and simulation for predictions about disease progression the overall economic situation tax incomes and population development In the same manner AI can prepare researchers for any emergency situation by backing the medical science Artificial Intelligence plays a key and cutting edge role in the preparedness for and dealing with the outbreak of global epidemics It can help researchers analyze global data about known viruses to predict the patterns of the next pandemic and the impacts it will have Not only prediction AI plays an increasingly important role in assessing readiness early detection identification of patients generating recommendations situation awareness and more It is up to the right input and the innovative ways by humans to leverage what AI can do As COVID 19 has grabbed the world and its economy today an analysis of the COVID 19 outbreak and the global responses and analytics will pay a long way in preparing humanity for such future situations Provides readers with understanding of how Artificial Intelligence can be applied to the prediction forecasting detection and testing of global epidemics using COVID 19 and other recent epidemics such as Ebola Corona viruses Zika influenza Dengue Chikungaya and malaria as case studies Includes background material regarding readiness for coping with epidemics including Machine Learning models for prediction of epidemic outbreaks based on existing data Includes technical coverage of key topics such as generating recommendations to combat outbreaks genome sequencing AI assisted testing AI assisted contact tracing situation awareness and combating disinformation and the role of Artificial Intelligence and Machine Learning in drug discovery vaccine development and drug re purposing Artificial Intelligence Noah Berlatsky,2011 Presents a collection of essays offering varying opinions on the subject of artificial intelligence **The Handbook of Artificial Intelligence and Journalism** Aynur Sarisakaloğlu,Martin Löffelholz,2025-11-18 Presents a comprehensive global overview of AI driven journalism and its transformative impact on media practices As artificial intelligence AI continues to reshape the media landscape The Handbook of Artificial Intelligence and Journalism provides the first comprehensive academic exploration of the intersection between AI technologies and

journalism Edited by Aynur Sarisakaloglu and Martin L. Feltholz this foundational volume brings together 37 leading scholars from six continents to examine how AI is redefining the structures practices and epistemologies of journalism Organized around key thematic areas the Handbook investigates the driving forces propelling the algorithmic transformation and unveils emerging trends in journalistic practice and journalism research moving beyond Western centric perspectives to incorporate diverse global experiences and knowledge production Twenty eight original chapters address systemic shifts such as evolving structures of media organizations changing roles of actors transformations in news production routines and shifting patterns of news consumption By integrating theoretical empirical and practical perspectives the Handbook sets the stage for a new research agenda for understanding AI driven journalism on a global scale Containing rigorous interdisciplinary scholarship and broad geographical coverage The Handbook of Artificial Intelligence and Journalism Integrates theoretical foundations empirical studies and practical applications in a cohesive structure Offers insights into journalism practices across a wide range of geographical contexts and engages with approaches that transcends Western dominated paradigms incorporating perspectives from the Global South Employs interdisciplinary frameworks to enhance the understanding of AI driven journalism Examines the sociotechnical dynamics of AI including its potential benefits and challenges for journalism Presents forward looking reflections on the future of journalism research in the AI era The Handbook of Artificial Intelligence and Journalism is ideal for undergraduate graduate and doctoral students in journalism communication and media studies programs It also serves as a vital reference for researchers educators media professionals and policy advisors engaged in digital journalism journalism research media innovation and public communication

Artificial Intelligence in Business Abdul Razzak Alshehadeh, Ihab Ali El-Qirem, Ghaleb Awad Elrefae, 2025-10-04 This book covers results of the 19th Scientific Annual International Conference for Business SICB Artificial Intelligence in Business This collection of 30 peer reviewed papers from the 19th SICB International Conference presents vital research on AI's integration into business practices Through six comprehensive sections the volume examines how AI is transforming multiple business domains AI in Accounting and Auditing explores automation's impact on auditing roles internal quality and financial reporting accuracy AI in Banking and Insurance investigates technologies revolutionizing financial services from drones in insurance to blockchain in banking systems AI in Educational Environments demonstrates how intelligent systems enhance learning experiences and professional development AI Integration with Emerging Technologies analyzes the convergence of AI with explainable knowledge systems metaverse applications and human centered workplace designs AI for Workflow Optimization provides insights into reinforcement learning for business processes and supply chain efficiencies AI's Impact on Financial Performance presents research on how AI enhanced customer experiences translate into tangible outcomes What distinguishes this volume is its balanced approach which addresses both technological capabilities and organizational ethical and human factors that determine successful implementation The diverse methodological approaches

provide a multifaceted perspective on AI's business applications. For organizations navigating digital transformation, these proceedings offer theoretical foundations and practical guidance toward responsible AI adoption that enhances competitive advantage while addressing emerging ethical challenges, making it an essential resource for researchers, business leaders, and policymakers.

Emerging Library Technologies Ida Arlene Joiner, 2018-08-09. *Emerging Library Technologies* is written for librarians, information professionals, teachers, administrators, researchers, undergraduate and graduate students, and others who are interested in learning about some of the most popular emerging technologies in the media today, such as artificial intelligence, robotics, drones, driverless vehicles, big data, virtual and augmented reality, 3D printing, and wearable technologies. This valuable resource shows how they can be used in libraries and resource centers and how to get stakeholder buy-in for implementing these technologies. Covers innovative insights on how these emerging technologies can be used in all types of libraries and resource centers. Discusses how to get key stakeholders on board before implementing emerging technologies, including a checklist to complete before presenting your technology proposal to senior management. Brings a unique perspective for assisting people who will be displaced by these emerging technologies. Includes resources at the end of every chapter on keeping abreast and building expertise on the emerging technology topic. Contains tips on how professionals can forge strategic relationships to collaborate on emerging technology projects, such as preparing students for STEM and STEAM careers. Poses engaging questions for further discussion after each chapter. Includes a comprehensive glossary at the end of each chapter.

Disinformation Countermeasures and Artificial Intelligence Oleksandr Makarenko, Paul Vines, George Cybenko, Ludmilla Huntsman, 2025-12-20. The *Disinformation Countermeasures and Artificial Intelligence* topic collection in *Frontiers in Artificial Intelligence and Frontiers in Big Data* journals will address the core problems of Cognitive Security (CogSec), AI-powered disinformation in cognitive warfare, machine learning techniques to counter disinformation, novel P3 (public-private partnership) models for countering synthetic disinformation, and cross-disciplinary methods of building cognitive resilience to malign influence operations with the use of AI. Artificial intelligence is changing the way we create and evaluate information, and this is happening during an infodemic while all governments and their citizens face the important challenge of disinformation affecting politics, public health (e.g., COVID-19), financial markets, and elections. Although the impact of disinformation is intrinsically difficult to quantify and prone to overestimation in the popular consciousness, specific examples such as lynchings catalyzed by disinformation spread over social media highlight that the threat it poses crosses social scales and boundaries. This threat extends into the realm of military combat as early as 2019, when a NATO StratCom experiment established that social media exploitation enabled successfully influencing soldiers participating in an exercise to carry out desired behaviors, such as leaving their positions, not fulfilling duties, etc. Bay and Biteniece (2019). Thus, information has become a global safety issue, while disinformation can kill. While malign actors weaponized information for years, governments have embedded information as a war-fighting function. The use of AI is

essential for scale speed and automation of offensive and defensive online influence operations Captured Minds: How Artificial Intelligence Shapes Civic Engagement, Threatens Mental Freedom, and Redefines Human Autonomy Archer Caldwell, 2025-09-08 Every advance in artificial intelligence brings new tools that can amplify civic participation empower communities and enhance democratic engagement Yet beneath the promise lies an unspoken danger the quiet erosion of mental freedom Captured Minds investigates the double edged nature of AI s role in public life On one hand AI can streamline civic processes strengthen access to information and energize political participation On the other it can hijack attention manipulate thought and reduce citizens to data points in algorithm driven systems of control With clarity and authority this book unpacks how AI technologies are reshaping attention autonomy and critical thinking It offers a balanced perspective revealing both the possibilities for stronger civic life and the urgent need for safeguards to protect individual freedom If you care about democracy human agency and the future of free thought in an AI powered world this is essential reading Impacts of Artificial Intelligence Michael A.
