Internal communication is a growing field with the number of specialists increasing worldwide. In spite of this and vast increases in spending on communication research shows that organizations are finding it difficult to raise the number of employees who feel well informed. Now more than ever internal communication does not just concern communication managers. In today's lean organizations line managers are taking on more and more of the burden of employee communication and managers of remote offices have to be their own communication managers.

Talking Business making communication work addresses the key issues in communication within organizations supported by case studies taken from experience of working with global businesses. It provides a coherent theory of business communication and shows how a radical difference to communication practice and business performance can be made. The authors employ an interactive structure throughout with signposts to link related cases and chapters.

Communication at Work Stephen R. Axley, 1996-04-30 Communication pervades virtually everything managers do. What most people mistakenly assume about communication can and does limit their effectiveness professionally and personally. Communication is much harder work and more complicated than people realize. Concrete advice and thought provoking questions show how to be a more effective communicator. Executives, researchers and upper level and graduate students of management, human relations and human resources, organizational behavior, leadership and communication will find this volume instructive and illuminating. The book explores and connects our uses of symbols and language particularly metaphors with how we think and act. It highlights a certain widely held metaphor for communication called the conduit metaphor and the inaction it implies. The book offers an alternative opposing perspective based on how human communication actually works. An appreciation of how communication works produces greater effectiveness, shared understanding and strong productive relationships between people. Those lacking this appreciation will more likely communicate and act in ways that are ultimately self-defeating and self-limiting. Enabling communication activities that help executives in their responsibilities of leadership, empowerment, team building and management of change and culture are explored in a comfortable conversational style.

Sostrin, 2013-11-07

Almost 400 years ago, philosophers John Locke and David Hume implicitly defined communication as a tool for the transmission of pure ideas, stating that the ideas themselves are what matter, not the way in which they are expressed and exchanged. Now known as the transmission model, this form of communication is still the foundation for academic courses in communication theory and practice and is embedded in most business literature and education that address subjects related to workplace communication, organization, behavior, and culture, leadership, and conflict resolution. But what if this accepted model of communication was incomplete? *Re-Making Communication at Work* argues that the transmission model of communication needs to be replaced by a new approach to communication. Sostrin challenges the status quo by exposing the most common myths that inaccurately define successful communication at work. These misperceptions are replaced by a set of core principles that deliver a clear mandate for re-making communication at work. Sostrin not only provides the theoretical foundation for this new approach but he uses a straightforward model and exercises that demonstrate how managers, students, and consultants can powerfully improve relationships, decision making, and collaboration with a few lines and circles. *Communicating at Work* Tony Alessandra, 1993-08-16
