Elements of Information Organization and Dissemination Amitabha Chatterjee,2016-11-05 Elements of Information Organization and Dissemination provides Information on how to organize and disseminate library and information science LIS a subject that is taught in many international Library Information Science university programs While there are many books covering different areas of the subject separately this book covers the entire subject area and incorporates the latest developments Presets an overview of the entire subject covering all relevant areas of library and information science Contains bulletpoints that highlight key features in each chapter Written in an accessible language this book is aimed at a wide audience of LIS academics

Understanding Community Librarianship Alistair Black,David Muddiman,2017-09-29 In the information society is the community focused library a real possibility This book reappraises the relationship between the library and its communities through an examination of the rise and decline of community librarianship over the last three decades The authors consider key models of community based library service and argue that bland assertions of community prevalence mask a complex and problematic relationship between a highly traditional public service bureaucracy and its users The resulting uncertainty of purpose they claim explains much of the current crisis of the public library movement Drawing on recent social science theory and empirical work in the field this book offers a new and critical perspective on the current public library debate It is essential reading for librarians students of information and library science and all who have a stake in the future of the public library As a case study of community public service and the local state it should also be of value to those with an interest in community development cultural policy and local government
