Beyond Broadband Access Richard D. Taylor, Amit M. Schejter, 2013-07-01 After broadband access what next What role do metrics play in understanding information societies And more important in shaping their policies Beyond counting people with broadband access how can economic and social metrics inform broadband policies help evaluate their outcomes and create useful models for achieving national goals This timely volume not only examines the traditional questions about broadband like availability and access but also explores and evaluates new metrics more applicable to the evolving technologies of information access Beyond Broadband Access brings together a stellar array of media policy scholars from a wide range of disciplines economics law policy studies computer science information science and communications studies Importantly it provides a well rounded international perspective on theoretical approaches to databased communications policymaking in the Americas Europe Asia and Africa Showcasing a diversity of approaches this invaluable collection helps to meet myriad challenges to improving the foundations for communications policy development Cyberspace Reflections Herman E. van Bolhuis, Vicente Colom, 1995 This report deals with the basic features and aspects of the emerging information society It is the first attempt to develop a comprehensive structural analysis for the electronic dimension the cyberspace The main focus lies on the implications the new Information and Communication Technology ICT have on society Exceeding the common frameworks which analyse mainly economic and technological facts the authors tried to frame the developments into a comprehensive view Two different perspectives are applied First the view from the networks as information transporters into society and secondly from the networks as electronic cyberspace to society This approach based on a thorough knowledge of the thematic brought up a new set of political and social problems to be solved and led to the insinuation of a tool kit for decision makers when approaching to the future cybernetic society The next publication will offer this tool kit in an extended and detailed form BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Sovereignty Blockchain 1.0* Lian Yuming, 2021-04-01 This book presents a general framework analysis of sovereignty in blockchain based on the concept of blockchain technology and specifically discusses the three theoretical foundations of sovereignty in blockchain data sovereignty theory social trust theory and smart contract theory It also explores the evolution of laws concerning data and digital rights how to build trust mechanisms for digital rights transactions as well as contract signing and the implementation of digital rights transactions **New Media and Revolution** Billie Jeanne Brownlee, 2020-07-16 The Arab Spring did not arise out of nowhere It was the physical manifestation of more than a decade of new media diffusion use and experimentation that empowered ordinary people during their everyday lives In this book Billie Jeanne Brownlee offers a refreshing insight into the way new media can facilitate a culture of resistance and dissent in authoritarian states Investigating the root causes of the Syrian uprising of 2011 New Media and Revolution shows how acts of online resistance prepared the ground for better organised street mobilisation The

book interprets the uprising not as the start of Syria's social mobilisation but as a shift from online to offline contestation and from localised and hidden practices of digital dissent to tangible mass street protests Brownlee goes beyond the common dichotomy that frames new media as either a deus ex machina or a means of expression to demonstrate that in Syria media was a nontraditional institution that enabled resistance to digitally manifest and gestate below within and parallel to formal institutions of power To refute the idea that the population of Syria was largely apathetic and apolitical prior to the uprising Brownlee explains that social media and technology created camouflaged geographies and spaces where individuals could protest without being detected Challenging the myth of authoritarian stability *New Media and Revolution* uncovers the dynamics of grassroots resistance blossoming under the radar of ordinary politics [The New Media Theory Reader](#) Robert Hassan, Julian Thomas, 2006-09 The study of new media opens up some of the most fascinating issues in contemporary culture bringing together key readings on new media what it is where it came from how it affects our lives and how it is managed It encourages readers to pay attention to the new in new media as well as consider it as a historical phenomenon
