

Cyril Burt *Psychologist* by L.S. Hearnshaw

The revealing story of the British psychologist whose data proving that intelligence was inherited was internationally accepted—until it turned out that he had falsified crucial evidence

"Hearnshaw uses Burt as a microcosm for examining the history of psychology and its impact on education in the 20th century."

Stephen Jay Gould, *Psychology Today*

Cyril Burt Psychologist

Caven S. McLoughlin

Cyril Burt Psychologist:

Cyril Burt, Psychologist Leslie Spencer Hearnshaw,1981 **Cyril Burt, Psychologist** Leslie Spencer Hearnshaw,1979 *Sir Cyril Burt, Psychologist and "the Essential Man"* Caven S. McLoughlin,1984 *Cyril Burt* Nicholas John Mackintosh,1995

When Sir Cyril Burt died in 1971 he was widely recognized as Britain's most eminent educational psychologist whose studies of gifted and delinquent children contributions to the development of factor analysis and research on the inheritance of intelligence brought widespread acclaim. Within five years of his death however he was publicly denounced as a fraud who had fabricated data to conclude that intelligence is genetically determined. Examiners of the published data found serious inconsistencies that raised questions about their authenticity the case has divided the scientific community ever since. Were the charges justified or was he a victim of critics fearful of validating such a politically unacceptable scientific theory. This is an up to date and unbiased analysis of one of the most notorious scandals in science now more timely and widely discussed than ever with the publication of *The Bell Curve* the best selling polemic that raises arguments comparable to Burt's. The distinguished contributors examine the controversial areas of Burt's work and argue that his defenders have sometimes but by no means always been correct and that his critics have often jumped to hasty conclusions. In their haste however these critics have missed crucial evidence that is not easily reconciled with Burt's total innocence leaving the perception that both cases are seriously flawed. An introductory chapter lays the background to the case followed by an examination of Burt's work that relates to the controversy. The book concludes with a chapter on Burt's character other cases of apparent scientific fraud and the impact of Burt's alleged fabrications. These findings have profound implications not only for the study of psychology but for the wider issues relating to integrity in scientific research and the impact of intelligence testing on social policy.

[The Burt Affair](#) Robert B. Joynson,2025-03-03 Few reputations had undergone so dramatic a reversal as that of the late Sir Cyril Burt. When he died in 1971 he was widely acclaimed as a founding father of British psychology and a commanding figure in the world of education. His decline began when it was alleged some five years later that he had fraudulently invented much of his most influential data on the inheritance of intelligence. The dispute which followed is one of the great causes célèbres of psychology. Originally published in 1989 Robert B Joynson took a penetrating new look at the Burt Affair examining in detail the grounds on which Burt had been accused. He concluded that the accusations were ill founded and that Burt must be exonerated. Dr Joynson's conclusions raised wider issues for psychology itself. How did such accusations come to be made and how did they come to be so widely accepted. Joynson believed that the episode pointed to inherent weaknesses and limitations in the discipline of psychology itself.

[The Cattell Controversy](#) William H. Tucker,2010-10-01 Raymond Cattell the father of personality trait measurement was one of the most influential psychologists in the twentieth century the author of fifty six books more than five hundred journal articles and book chapters and some thirty standardized instruments for assessing personality and intelligence in a

professional career that spanned almost seventy years In August 1997 the American Psychological Association announced that Cattell had been selected the recipient of the American Psychological Foundation Gold Medal Award for Life Achievement in Psychological Science Then only two days before the scheduled ceremony the APF abruptly postponed the presentation of the award due to concerns involving Cattell s views on racial segregation and eugenics In addition to his mainstream research Cattell had also authored a series of publications that posited evolutionary progress as the ultimate goal of human existence and argued that scientifically measurable criteria should be used to distinguish successful from failing racial groups so that the latter might be gradually phased out by non violent methods such as regulation of birth control Derived from science Cattell s evolutionary philosophy was intended to be the basis of a full blown religion Although the earliest of these works had been published in the 1930s near the end of an era in which eugenically based policies for human improvement were much more acceptable Cattell promoted similar ideas well into the 1980s and 90s The Cattell Controversy describes Cattell s socio religious beliefs in detail and analyzes their relationship to his scientific contributions William H Tucker discusses the controversy that arose within the field in response to the award s postponement after which Cattell withdrew his name from consideration for the award but insisted that his position had been distorted by taking statements out of context Reflecting on these events Tucker concludes with a discussion of the complex question of whether and how a scientist s ideological views should ever be a relevant factor in determining the value of his or her contributions to the field

Genes, Brain Function, and Behavior Douglas Wahlsten,2019-03-19 Genes Brain Function and Behavior offers a concise description of the nervous system that processes sensory input and initiates motor movements It reviews how behaviors are defined and measured and how experts decide when a behavior is perturbed and in need of treatment Behavioral disorders that are clearly related to a defect in a specific gene are reviewed and the challenges of understanding complex traits such as intelligence autism and schizophrenia that involve numerous genes and environmental factors are explored New methods of altering genes offer hope for treating or even preventing difficulties that arise in our genes This book explains what genes are what they do in the nervous system and how this impacts both brain function and behavior

The Palgrave Handbook of Educational Thinkers Brett A. Geier,2024-08-21 This handbook presents a durable comprehensive and up to date resource covering the seminal thinkers in education of past and present Each entry will capture the professional background of a legendary thinker and presents their key insights new thinking and major legacies to the field of education Carefully brought together to present a balance of gender and geographical contexts as well as areas of thought and work in the broad field of education this handbook provides a unique history and overview of figures who have shaped education and educational thinking throughout the world

California. Court of Appeal (6th Appellate District). Records and Briefs California (State)., Human Rights and Forced Displacement Joan Fitzpatrick,Anne Bayefsky,2021-10-18 A comprehensive approach to the problem of forced displacement involves understanding and

addressing human rights issues in a multiplicity of forms This collection aims to contribute to the institutional capacities of the many different players to operationalise the human rights of refugees and the internally displaced by conceptualising the emerging issues and priorities and advancing policy thinking on human rights and forced displacement Each of the sections of the book approaches this issue from a different perspective The section on standards asks What international human rights standards apply to the forcibly displaced How do they apply Have there been failures Are there gaps in the international standards Are there conflicts The section on monitoring reporting asks Who monitors human rights violations Who reports the findings and to whom What are the respective responsibilities of the different actors The section on solutions asks where solutions lie Environmental planning and development International prosecution of war criminals Rebuilding legal infrastructures and national institutions Enhancing the role of human rights NGOs to monitor report and frame forced displacement in human rights terms for increased public understanding and interest The final section looks to the future and considers where asylum fits into the spectrum of solving the nature of forced displacement today the capacities and limitations of international criminal tribunals and the co operative arrangements and practical divisions of labour that need to be fashioned between international agencies and service relief providers

The "Racial" Economy of Science Sandra Harding, 1993-10-22 The classic and recent essays gathered here will challenge scholars in the natural sciences philosophy sociology anthropology and women s studies to examine the role of racism in the construction and application of the sciences Harding has also created a useful text for diverse classroom settings Library Journal A rich lode of readily accessible thought on the nature and practice of science in society Highly recommended Choice This is an excellent collection of essays that should prove useful in a wide range of STS courses Science Technology and Society important and provocative The Women s Review of Books The timeliness and utility of this large interdisciplinary reader on the relation of Western science to other cultures and to world history can hardly be overemphasized It provides a tremendous resource for teaching and for research Ethics Excellent The Reader s Review Sandra Harding is an intellectually fearless scholar She has assembled a bold impressive collection of essays to make a volume of illuminating power This brilliantly edited book is essential reading for all who seek understanding of the multicultural debates of our age Never has a book been more timely Darlene Clark Hine These authors dispute science s legitimation of culturally approved definitions of race difference including craniology and the measurement of IQ the notorious Tuskegee syphilis experiments and the dependence of Third World research on First World agendas

The Psychologist ,2004 **The Literary Digest** ,1921 **Mass Education in England** John Henry Garrett,1928 *Forum of Education* ,1923 **The Forum of Education** ,1923 **The Bookman** ,1925 *Journal of Delinquency* ,1922 **The Journal of Delinquency** ,1922 *The Journal of Juvenile Research* ,1922
