Cytologic Detection Of Urothelial Lesions:

Cytologic Detection of Urothelial Lesions Dorothy L. Rosenthal, Stephen S. Raab, 2006-06-02 Dr Rosenthal and Dr Raab correctly place urinary cytology in the backwater of the field noting the difficulties many of us encounter when assessing urinary specimens or washes of the urinary tract For a variety of reasons these specimens are saved for the end of the day cause the most trouble and frustration and are the least successful from the standpoint of the pathologist the urologist or the patient This book represents in keeping with the philosophy behind the series Essentials in Cytopathology a systematic description of microscopic findings in urinary specimens whether normal reactive or neoplastic accompanied by an extensive collection of photographs in color illustrative of the full range of lesions Drawing upon their personal collections and the diagnostic resources of several major cytologic laboratories they have assembled examples of the common diagnostic entities in the field plus an assortment of confounding circumstances which contribute to the difficulties presented by urinary specimens Handy tables accompany the photographs offering help where needed This is particularly relevant because the subtlety of urinary cytology deserves the dependable diagnostic categorization obtained with samples from other sites

They clearly discuss the circumstances under which new techniques are advisable and the relevance of these techniques when difficult questions of detail arise. At the same time, basic scientific principles are presented in comprehensible form. The atlas section gives examples of urologic cytology, compares pathological with normal results, discusses the problems in differential diagnosis, and points the way to solutions.
