D. M. Armstrong

D M Armstrong:

David Armstrong Stephen Mumford, 2014-12-05 David D M Armstrong is one of Australia's greatest philosophers. His chief philosophical achievement has been the development of a core metaphysical programme embracing the topics of universals, laws, modality, and facts, a naturalistic metaphysics consistent with a scientific view of the natural world. It is primarily through his work that Australian philosophy and Australian metaphysics in particular enjoys such a high reputation in the rest of the world. In this book, Stephen Mumford offers an introduction to the full range of Armstrong's thought. Mumford begins with a discussion of Armstrong's naturalism, his most general commitment, and his realism about universals. He then examines his theories of laws, modality, and dispositions, which make up the basics of Armstrong's core theory. With this in place, Mumford explores his ideas on perception, mind, and belief, before returning to metaphysics in the last two chapters, looking at truth and the new view of instantiation. The book is a dispassionate, fair, and unbiased account of Armstrong's thought. Although Armstrong's is a body of work that Mumford regards highly and of real significance, he nevertheless highlights areas of weakness and issues about which there is room for further debate.

The Philosophical Correspondence of David Armstrong and David Lewis, 2025-07-31 This volume contains the complete correspondence of two of the leading analytic philosophers of the late twentieth century, David Armstrong and David Lewis. Comprising some 345 letters, including letters to and from third parties, this correspondence is at once a deep philosophical resource, shedding new light on the philosophical development of two of the great late twentieth century philosophers, and a record of the development of a philosophical friendship. The letters are valuable not only for the light they shed on the background to many of Armstrong's and Lewis' major publications, but also for what they show us about the practice of philosophy. The correspondence is a window into both the philosophical content of two leading thinkers' minds and an exemplar of how philosophy of the highest level can be done.

D.M. Armstrong R. Bogdan, 2012-12-06 The aim of this series is to inform both professional philosophers and a larger readership of social and natural scientists, methodologists, mathematicians, students, teachers, publishers, etc. about what is going on, who's who, and who does what in contemporary philosophy and logic. **PROFILES** is designed to present the research activity and the results of already outstanding personalities and schools, and of newly emerging ones, in the various fields of philosophy and logic. There are many *Festschrift* volumes dedicated to various philosophers. There is the celebrated *Library of Living Philosophers*, edited by P. A. Schilpp, whose format influenced the present enterprise. Still, they can only cover very little of the contemporary philosophical scene. Faced with a tremendous expansion of philosophical information and with an almost frightening division of labor and increasing specialization, we need systematic and regular ways of keeping track of what happens in the profession. **PROFILES** is intended to perform such a function. Each volume is devoted to one or several philosophers whose views and results are presented and discussed. The profiled philosopher will summarize and review his or her own work in the main fields of significant contribution. This work

will be discussed and evaluated by invited contributors Relevant historical and or biographical data an up to date bibliography with short abstracts of the most important works and whenever possible re ferences to significant reviews and discussions will also be included

Universals D. M. Armstrong,1989-09-26 In this short text a distinguished philosopher turns his attention to one of the oldest and most fundamental philosophical problems of all How it is that we are able to sort and classify different things as being of the same natural class Professor Armstrong carefully sets out six major theories ancient modern and contemporary and assesses the strengths and weaknesses of each Recognizing that there are no final victories or defeats in metaphysics Armstrong nonetheless defends a traditional account of universals as the most satisfactory theory we have This study is written for advanced students but as Armstrong goes considerably beyond his earlier work on this topic it will interest professional scholars as well Carefully plotted and clearly written **Universals** is both a paradigm of exposition and a case study on the value of careful analysis of fundamental issues in philosophy

A Materialist Theory of the Mind D. M. Armstrong,2022-10-06 D M Armstrong s A Materialist Theory of the Mind is widely known as one of the most important defences of the view that mental states are nothing but physical states of the brain A landmark of twentieth century philosophy of mind it launched the physicalist revolution in approaches to the mind and has been engaged with debated and puzzled over ever since its first publication over fifty years ago Ranging over a remarkable number of topics from behaviourism the will and knowledge to perception bodily sensation and introspection Armstrong argues that mental states

play a causally intermediate role between stimuli other mental states and behavioural responses He uses several illuminating examples to illustrate this such as the classic case of pain This Routledge Classics edition includes a new Foreword by Peter Anstey placing Armstrong s book in helpful philosophical and historical context **Guelph** Guelph Historical Society,2000
