Freidus, Alexander Kohut Memorial Foundation, 1929 **The Strad** , 1896 **A Jewish Dancing Master of the Renaissance** Otto Kinkeldey, 1929 **The Terpsichorean** , 1918 **Improvisation in the Arts of the Middle Ages and Renaissance** Timothy James McGee, 2003

One impression that stands out from this collection is the extent to which improvisation was an important factor in all of the arts. As each of the authors assembles a case by ferreting out bits and pieces of information having to do with a single art, the weight of the assembled material lends additional strength to each case. By considering the overall picture that results as well as that made by each of the individual studies, the reader is able to see much more clearly the role played by improvisation from the late Middle Ages through to the time of Shakespeare and beyond. A careful reading of the essays brings with it the awareness that to ignore improvisation is to distort the art in a major way. In light of the present volume, the very concept of faithful historical re-creation takes on a much broader and more complex character.

Dance and the Music of J. S. Bach Meredith Little, Natalie Jenne, 2009-01-27

A unique study of dance forms and rhythms in the Baroque composer's repertoire. Stylized dance music and music based on dance rhythms pervade Bach's compositions. Although the music of this very special genre has long been a part of every serious musician's repertoire, little has been written about it. The original edition of this book addressed works that bore the names of dances, a considerable corpus. In this expanded version of their practical and insightful study, Meredith Little and Natalie Jenne apply the same principles to the study of a great number of Bach's works that use identifiable dance rhythms but do not bear dance-specific titles. Part I describes French dance practices in the cities and courts most familiar to Bach. The terminology and analytical tools necessary for discussing dance music of Bach's time are laid out. Part II presents the dance forms that Bach used, annotating all of his named dances. Little and Jenne draw on choreographies, harmony theorists' writings, and the music of many seventeenth and eighteenth-century composers in order to arrive at a model for each dance type. Additionally, in Appendix A, all of Bach's named dances are listed in convenient tabular form; included are the BWV number for each piece, the date of composition, the larger work in which it appears, the instrumentation, and the meter. Appendix B supplies the same data for pieces recognizable as dance types but not named as such. More than ever, this book will stimulate both the musical scholar and the performer with a new perspective at the rhythmic workings of Bach's remarkable repertoire of dance-based music.
