the redefinition of socio spatial concepts By using an interdisciplinary relational approach the book revisits certain concepts such as exclusion heritage or distance in order to understand spatialities beyond the oppositions of fixity mobility private public or here elsewhere The book sheds light on the capacities for resistance of mobile persons in Singapore Dakar Bangkok Amman Paris New York or Mexico by studying the power relationships that are established in situations of mobility By deciphering the values that characterize regimes of im mobility the contributors stress the normative injunctions of public policies and social practices The originality of the work lies in capturing the deployment of alternative spatialities and underlining how they are reshaped between sedentary and mobility regimes It highlights the importance of fully associating mobility with its characteristics of ephemerality and fluidity in our theorizations and understandings of spatialities By taking a post structuralist posture the book makes it possible to establish a logic of and to design a between of things and to reverse ontology This allows the temporary and the connected to be rehabilitated beyond distance in our practical knowledge of spatialities and territorialities As such the volume will be of interest to scholars of geography sociology anthropology and urban studies with interests in mobility migration and relational thought
