cultural heritage **Darwin and Modern Science** A. C. Seward,2016-02-22 PREFACE At the suggestion of the Cambridge Philosophical Society the Syndics of the University Press decided in March 1908 to arrange for the publication of a series of Essays in commemoration of the Centenary of the birth of Charles Darwin and of the Fiftieth anniversary of the publication of The Origin of Species The preliminary arrangements were made by a committee consisting of the following representatives of the Council of the Philosophical Society and of the Press Syndicate Dr H K Anderson Prof Bateson Mr Francis Darwin Dr Hobson Dr Marr Prof Sedgwick Mr David Sharp Mr Shipley Prof Sorley Prof Seward In the course of the preparation of the volume the original scheme and list of authors have been modified a few of those invited to contribute essays were for various reasons unable to do so and some alterations have been made in the titles of articles For the selection of authors and for the choice of subjects the committee are mainly responsible but for such share of the work in the preparation of the volume as usually falls to the lot of an editor I accept full responsibility Authors were asked to address themselves primarily to the educated layman rather than to the expert It was hoped that the publication of the essays would serve the double purpose of illustrating the far reaching influence of Darwin s work on the progress of knowledge and the present attitude of original investigators and thinkers towards the views embodied in Darwin s works Darwin and Modern Science A. C. Seward,2016-08-17 Excerpt Ethics Cosmology were stirred to their foundations and The Origin of Species proved itself to be the fixed point which the general doctrine needed in order to move the world In the contributions to this Memorial Volume some of the authors have more especially concerned themselves with the results achieved by Darwin s own work while others pass in review the progress of research on lines which though unknown or but little followed in his day are the direct outcome of his work The divergence of views among biologists in regard to the origin of species and as to the most promising directions in which to seek for truth is illustrated by the different opinions of contributors Whether Darwin s views on the modus operandi of evolutionary forces receive further confirmation in the future or whether they are materially modified in no way affects the truth of the statement that by employing his life in adding a little to Natural Science he revolutionised the world of thought **Darwin and Modern Science; Essays in Commemoration of the Centenary of the Birth of**

C. Seward,2019-10-10 The Cambridge Philosophical Society collected this series of essays in commemoration of the centenary of the birth of Charles Darwin and the 50th anniversary of the publication of *The Origin of Species* Aiming to be accessible to the educated layman the eminent contributors reviewed the impact of Darwin s ideas in many spheres They addressed contemporary 1909 attitudes Darwin s theories and their far reaching implications and the progress of new lines of research that had emerged from them The diversity of views among biologists regarding both the origin of species and the best directions for further research is clearly evident In his work Darwin had sought only the truth writing Absolute accuracy is the hardest merit to attain and the highest merit Any deviation is ruin However dramatic the controversies he stirred what shines from these essays is profound admiration for both Darwin s intellect and the quality of his character **Darwin and Modern Science** A.
