## **Dutch Response To Hiv:**

*The Dutch Response To HIV* Theo Sandfort, 2002-09-11 The Netherlands response to AIDS is widely regarded as well organized and effective This is largely due to the timely response to the threat of the disease with a prevention programme starting in 1982 This Dutch example provides an instructive case study for other countries with relevance for policy makers now and in the future The book documents and discusses Dutch prevention policy most specifically the prevention policies and activities for various target groups the focus on prevention research and studies on sexuality and health behaviour and the emphasis on individual responsibility

**Disease and Democracy** Peter Baldwin, 2005-05-16 A historical masterpiece Just when we thought we knew everything about the politics and policies of the HIV AIDS pandemic Peter Baldwin surprises us with innovative insights about the sharp differences in policy among countries as well as complex tradeoffs between civil liberties and public goods This is a refreshing and readable book in which AIDS is used as a lens to understand the public health enterprise ranging from leprosy and syphilis to tuberculosis and SARS Baldwin offers a deeply historical and comparative understanding of HIV in the industrialized world

Lawrence O Gostin author of *Public Health Law Power Duty Restraint* Although a vast literature has emerged to chronicle and reflect on the history of the AIDS epidemic since it was first reported almost a quarter of a century ago there is nothing like Peter Baldwin's probing and synthetic analysis of AIDS in the industrialized world

Building on his masterful *Contagion and the State in Europe 1830-1930* Baldwin has provided a complex historical tapestry of how an epidemic threat has challenged and exposed democracies that thought infectious threats a thing of the past

Ronald Bayer author of *Private Acts Social Consequences Aids and the Politics Of Public Health* and coauthor with Gerald Oppenheimer of *AIDS Doctors Voices from the Epidemic*

**HIV Testing** Shelley Noel Facente, 2004

Managing AIDS Patrick Kenis, Bernd Marin, 2018-12-20 First published in 1997 this volume examines how in the last 15 years HIV AIDS has become a challenge for public health public policy and research Reducing further HIV transmissions as well reducing the personal and social impact of HIV AIDS requires a wide range of activities developed by a wide range of organizations the supply of which varies widely between countries regions and social groups The book describes the programmes which seem particularly effective in dealing with HIV AIDS and sets out to explain the disparities in their distribution It documents and tries to understand both similarities as well as the variety of national approaches taken to cope with HIV AIDS in a number of European countries On the basis of the welfare mix model six country studies and an introductory chapter draw particular attention to the different mixes of public policies and private non profit community based activities the functional mixes between different types of services in the areas of prevention care research control and monitoring interest representation fund raising The mixes between specialized so called exclusive HIV AIDS service organizations and services made available by general comprehensive or so called inclusive institutions which provide AIDS specific programmes among other activities will also be elaborated The whole range of HIV AIDS activities from professional

services to self help is analysed in a comparative perspective The book is based on data from the European Centre WHO Collaborative Study Managing AIDS It is a comparative policy study focused on the role of non profit organizations in public health and welfare policy covering several thousands of organizations and HIV AIDS programmes in six European countries Unexpected similarities and divergence in AIDS service organizations across Europe were found The sheer multitude of programmes offered called a surprise to experts in the field as did remaining conspicuous blank spots or deficiencies in services Degrees of AIDS policy coherence prevention efforts service density and quality self help and professionalization medicalization vs social integration of HIV AIDS programmes sectoral specialization and institutionalization all vary tremendously as do the efficiency and effectiveness of organizational responses to HIV AIDS Interestingly variations in the supply of activities can hardly be explained by epidemiological patterns and corresponding demand and needs AIDS management requires long term institutional strategies and information which cannot be provided by epidemiological or behavioural analysis alone An effective struggle against HIV AIDS also requires institution building inter organizational development and policy field analysis
