Dying Cities:

Schools and Urban Revitalization Kelly L. Patterson, Robert Mark Silverman, 2013-10-08 New research in community development shows that institutions matter. Where the private sector disinvests from the inner city, public and nonprofit institutions step in and provide engines to economic revitalization and promote greater equity in society. *Schools and Urban Revitalization* collects emerging research in this field with special interest in new school neighborhood partnerships that lead today's most vibrant policy responses to urban blight.

Sunburnt Cities Justin B. Hollander, 2011-01-18 In recent years there has been a growing focus on urban and environmental studies and the skills and techniques needed to address the wider challenges of how to create sustainable communities. Central to that demand is the increasing urgency of addressing the issue of urban decline and the response has almost always been to pursue growth policies to attempt to reverse that decline. The track record of growth policies has been mixed at best. Until the first decade of the twenty-first century, decline was assumed to be an issue only for former industrial cities, the so-called Rust Belt. But the sudden reversal in growth in the major cities of the American Sunbelt has shown that urban decline can be a much wider issue. Justin Hollander's research into urban decline in both the Sun and Rust Belts draws lessons for planners and policy makers that can be applied universally. Hollander addresses the reasons and statistics behind these shrinking cities with a positive outlook, arguing that growth for growth's sake is not beneficial for communities, suggesting instead that urban development could be achieved through shrinkage. Case studies on Phoenix, Flint, Orlando, and Fresno support the argument, and Hollander delves into the numbers, literature, and individual lives affected and how they have changed in response to the declining regions. Written for urban scholars and to suit a wide range of courses focused on contemporary urban studies, this text forms a base for all study on shrinking cities for professionals, academics, and students in urban design, planning, public administration, and sociology.

Virtue Ethics for the Real World Howard J. Curzer, 2023-02-10 In *Virtue Ethics for the Real World: Improving Character without Idealization*, Howard J. Curzer argues that character ideals seduce virtue ethicists into counterintuitive claims, mislead, and psychologically harm people seeking to improve their characters and sometimes become tools for exploitation. Curzer offers a theory of Aristotelian virtue ethics that eschews idealization and that harmonizes with common sense. To explain the many dilemmas of ordinary life, he allows that different virtues sometimes enjoin incompatible actions and even enjoin actions that conflict with duty. Curzer defends the doctrine of the mean, arguing that idealized traits such as unilateral forgiveness, universal civility, unconditional commitments, and unlimited generosity are not virtues. He shows that the reciprocity of virtues doctrine depends upon idealization and rejects it. When undergirding his theory, Curzer wears several hats. He is a eudaimonist when grounding virtue, a constructivist when grounding value, and a perspectivist à la Nietzsche when grounding virtuous action. How can people improve without aiming at an ideal? Curzer offers an individualized approach to character improvement modeled on contemporary medicine: First, diagnose each person's character flaws. Then, tailor treatment plans to

each flaw An important tool is a fine grained table of the components of character their failure modes and corresponding therapies Curzer provides the beginnings of such a table

An Ordinary City Justin B. Hollander, 2017-08-08 This book paints an intimate portrait of an overlooked kind of city that neither grows nor declines drastically In fact New Bedford Massachusetts represents an entire category of cities that escape mainstream urban studies more customary attention to global cities New York booming cities Atlanta and shrinking cities Flint New Bedford style ordinary cities are none of these they neither grow nor decline drastically but in their inconspicuousness they account for a vast majority of all cities Given the complexities of growth and decline both temporarily and spatially how does a city manage change and physically adapt to growth and decline This book offers an answer through a detailed analysis of the politics environment planning strategies and history of New Bedford
