Abstract

The possibility of using mathematics to model church growth is investigated using ideas from population modeling. It is proposed that a major mechanism of growth is through contact between religious enthusiasts and unbelievers, where the enthusiasts are only enthusiastic for a limited period. After that period they remain church members but less effective in recruitment. This leads to the general epidemic model which is applied to a variety of church growth situations. Results show that even a simple model like this can help understand the way in which churches grow, particularly in times of religious revival. This is a revised version of Hayward (1999) using System Dynamics and some small modifications to the SIR model ¹.

Key Words: Church Growth, Population Models, Diffusion, Differential Equations, Socio-physics, Epidemics, Revival, System Dynamics, Loop Impact.

1 Introduction

1.1 Background To Church Growth

“Church Growth” is a recent subject area which seeks to analyse why Christian churches, at various levels of organisation, grow or decline. Although spiritual growth is included in the subject, numerical growth – how many attend or belong to a church – is a vital area for analysis. The stimulus for investigating the reasons why churches grow came from western missionary organisations in the late 1950’s. They were concerned with the effectiveness of the missions they had founded, and needed to examine this effectiveness in order to determine priorities for funding. The pioneer in this field was Donald McGavran who did much to encourage these missionary organisations to see the vast potential for numerical growth in the non-western world. Although numerical growth is not a requirement of all missionary endeavours (McGavran, 1963), it was nevertheless felt that situations needed to be analysed with the factors that encourage and inhibit growth identified.

Church growth thinking is divided into two strands; the Church Growth Movement, which is based within the denominations and seminaries of the Christian church to serve their needs; and the Social Science strand whose focus is academic research. The two strands have tended to remain separate, perhaps reflecting a certain amount of mutual suspicion between them. It is perhaps not surprising that those working within churches distrust sociologists as until recently the prevailing

Ecclesial Identification beyond Late Modern Individualism? Karl Inge Tangen, 2012-03-06 Why do some late modern churches grow counter to the trend in Western Europe Why do people identify with such churches and does identification lead to morally transforming commitments beyond late modern consumerism This case study investigates these questions based on real life or empirical research which include both the level of individual life strategies and organisational practice in two growing European churches This innovative and interdisciplinary study draws on recent findings in theology moral philosophy sociology and organisational psychology Its findings may prove useful not only for scholars in these disciplines it may also enrich the reflection of practitioners who seek to perform the difficult art of transformational leadership in a late modern context

DEVELOPING HEALTHY CHURCHES Kieran Beville, 2014-12-10 In an age obsessed with physical and psychological health the author emphasizes the importance of spiritual well being as an essential element of holistic health for the individual Christian and for Christian communities This work constitutes a template for a spiritual audit of the local church It offers an appointment with the Great Physician that no Christian can afford to ignore *Developing Healthy Churches A Case Study in Revelation* begins with a well researched outline of the origins and development of the church health movement With that background in mind the author aware that throughout the history of the church there have been a number of diverse views about how Revelation ought to be interpreted presents the reader with four distinct

interpretive models These are the idealist preterist historicist and futurist Beville explains these interpretive approaches simply and critiques them fairly Revelation is a complex but intriguing book which presents seven letters to the churches of Asia Minor However this easy to read work will take readers to the heart of the matter by taking them to the heart of Jesus The historical and cultural background provides fascinating insights to the meaning of Christ s words to those churches then and to all churches now The author elicits essential application for the church today He presents timeless and timely truths in a fresh and forthright manner The reader is informed about issues of particular historical significance in a way that has contemporary resonance Here is a work that cautions about complacency confronts compromise and challenges the carnality of Christians in contemporary culture Beville tells us not only what Jesus desires from his disciples but also what He demands Thus this work presents uncomfortable truth for comfortable churches because it allows the voice of Jesus to be heard with clarity amongst the clamor of church activity Christians who want to restore their vision and vigor will find this book immensely profitable
