Advanced Power System Manual:

Advanced Load Dispatch for Power Systems E. Mariani, S.S. Murthy, 2012-12-06 The series Advances in Industrial Control aims to report and encourage technology transfer in control engineering The rapid development of control technology impacts all areas of the control discipline New theory new controllers actuators sensors new industrial processes computer methods new applications new philosophies new challenges Much of this development work resides in industrial reports feasibility study papers and the reports of advanced collaborative projects The series offers an opportunity for researchers to present an extended exposition of such new work in all aspects of industrial control for wider and rapid dissemination In Europe and soon in the United States power system deregulation is becoming widespread This involves the privatisation of former public power utilities and the creation of power markets The United Kingdom has recently undergone this transformation and the countries of the European Union are being encouraged to follow this deregulation policy This volume Advanced Load Dispatch for Power Systems and its companion volume Control of Modern Integrated Power Systems both by Professor E Mariani and Professor S S Murthy are therefore very timely additions to the power system literature and to the Advances in Industrial Control series

A Practical Guide for Advanced Methods in Solar Photovoltaic Systems Adel Mellit, Mohamed Benghanem, 2020-05-27 The present book focuses on recent advances methods and applications in photovoltaic PV systems The book is divided into two parts the first part deals with some theoretical simulation and experiments on solar cells including efficiency improvement new materials and behavior performances While the second part of the book devoted mainly on the application of advanced methods in PV systems including advanced control FPGA implementation output power

forecasting based artificial intelligence technique AI high PV penetration reconfigurable PV architectures and fault detection and diagnosis based AI The authors of the book trying to show to readers more details about some theoretical methods and applications in solar cells and PV systems eg advanced algorithms for control optimization power forecasting monitoring and fault diagnosis methods The applications are mainly carried out in different laboratories and location around the world as projects Algeria KSA Turkey Morocco Italy and France The book will be addressed to scientists academics researchers and PhD students working in this topic The book will help readers to understand some applications including control forecasting monitoring fault diagnosis of photovoltaic plants as well as in solar cells such as behavior performances and efficiency improvement It could be also be used as a reference and help industry sectors interested by prototype development
