Cyberspace The World Of Digital Architecture:

Cyberspace ,2001 The term cyberspace was first penned in 1984 by William Gibson in his science fiction novel Neuromancer However the architectural possibilities of this area of design were being investigated well before the term was popularised and with good reason   Making the Digital City Alessandro Aurigi,2005 Since the late 1990s Information and Communication Technologies ICTs have been hailed as a potentially revolutionary feature of the planning and management of Western cities Economic regeneration and place promotion strategies have exploited these new technologies city management has experimented with electronically distributed services and participation in public life and democratic decision making processes can be made more flexible by the use of ICTs All of these technological initiatives have often been presented and accessed via an urban front end information site known as digital city or city network Illustrated by a range of European case studies this volume examines the social political and management issues and potential problems in the establishment of an electronic layer of information and services in cities The book provides a better understanding of the direction European cities are going towards in the implementation of ICTs   **Designing Digital Space** Daniela Bertol,1996-12-20 The Complete Guide to Virtual Reality in Architecture andDesign The first in depth book on virtual reality VR aimed specificallyat architecture and design professionals Designing Digital Spacesteers you skillfully through the learning curve of this excitingnew technology Beginning with a historical overview of theevolution of architectural representations this unique resourceexplains what VR is how it is being applied today and how itpromises to revolutionize not only the design process but the formand function of the built environment itself Vividly illustratinghow VR fits alongside traditional methods of architecturalrepresentation this comprehensive guide prepares you to makeoptimum practical use of this powerful interactive tool andembrace the new role of the architect in a virtually designedworld Offers in depth coverage of the virtual universe datarepresentation and information management static and dynamicworlds tracking and visual display systems control devices andmore Examines a wide range of current VR architectural applications from walkthroughs simulations and evaluations to reconstructionsand networked environments Includes insightful essays by leading VR developers covering someof today s most innovative projects Integrates VR into the historical framework of architecturaldevelopment with detailed sections on the past present andfuture Features a dazzling array of virtual world images and sequentialdisplays Explores the potential impact of digital architecture on the builtenvironment of the future

Dynamics in Chinese Digital Commons Hu Ling,2024-12-09 The book provides an up to date comprehensive and critical explanation of digital commons in China It aims to reshape the theoretical discussion of digital commons stressing the significance of digital mode of production and power division structure between government and digital platforms both characters shed light on how China has developed its digital economy and maintained a relatively innovative cyberspace during the past 20 years This book could serve as a foundational analysis for future studies on China s Internet The book will

appeal to scholars entrepreneurs and policymakers interested in digital commons governance of cyberspace and China s political economy   *Arquitectonica* Beth Dunlop,1991 First known for its flamboyant contributions to Miami s skyline the firm of Arquitectonica and its brilliant young principals Bernardo Fort Bressia and Laurinda Spear have pursued an unconventional modernism that is both abstract and romantic playful and dramatic This lovely book covers some 40

Cyberspace, as a Generator Concept for the Future Gözde Kan,İzmir Institute of Technology. Architecture,1999 Within the scope of this study while questioning the impacts of digital technology on the individual and architecture the thesis contains theories and projections relating to the new and future possibilities of the architectural design process in the information age as explored through the digital medium as well as the transfer of the digital ideas into reality The aim is to widen the understanding of the new possibilities for architecture The concepts metaphors possibilities techniques and expressions available to the designers of the virtual world are discussed and exemplified The new applications and opportunities that the digital world has to offer cyber architects of the future are explored The thesis aimed to form a discussion on investigating the role of computer on design and what the idea of virtuality offer to architecture related with the projects In this regard the idea which is aimed to achieve is in all these transformations architecture too lives challenges inside and tries to find a new way in expressing the ideas together with cooperating the other disciplines Today in every field of our life we have been liberalizated or more truly virtualized A general movement of virtualization has begun to affect not only the fields of information and communication but also our physical presence so as architecture As a result thesis tries to answer the questions of what is the break through Is the break through only in technology not in architecture or is the computer more than a representational tool including a series of comparative analysis Key Words cyberspace virtual reality computer aided design information technology hypersurface and liquid architecture future media architectural space philosophy digital architecture information age internet interaction simulacr cyberpunk cyberception cyberculture
