Whitmore, 2001 Active learning benefits everyone in all levels and types of libraries. Students, the general public, interns, and new reference staff need to find information and conduct research. One way to help them understand research strategies is to provide a structured opportunity to experience information seeking. Librarians want learners to retain and apply what is taught. Finding material and writing research papers is a way of life in the schools, colleges, and universities which most students attend. Students will continue to use the skills and techniques learned from library instruction throughout their lifetimes. This book includes seven lesson plans covering various topics in The Arts, seven lesson plans in literature and communications, and six lesson plans in music. Each of the contributing authors is a specialist in his area of expertise and is sharing that knowledge with colleagues. It is an excellent resource for librarians planning sessions to undergraduate students in those disciplines. The format used is one in which each chapter is a lesson plan that includes active learning exercises. Library instruction librarians are able to save a great deal of time with the design of this unique book because the exercises can be easily customized to fit the needs of individual libraries.
