Dynamical Problems In Soliton Systems:

Dynamical Problems in Soliton Systems Shozo Takeno, 2014-01-15 *Dynamical Problems in Soliton Systems* Shozo Takeno, 2013-03-14 This volume contains most of the papers presented in the oral session of the 7th Kyoto Summer Institute KSI on Dynamical Problems in Soliton Systems held in Kyoto from August 27 to 31 1984 Furthermore it contains contributions of R K Bullough H H Chen A S Davydov and N Sanchez who unfortunately could not attend Thirty six papers were presented in the oral session and 17 papers in the poster session The meeting brought together 109 physicists and mathematicians of which 22 were from abroad see group photograph The KSI is an international meeting organized by the Research Institute for Fundamental Physics RIFP Kyoto University to discuss various current problems of fundamental importance in theoretical physics The 7th KSI was the first international meeting on solitons in Japan Early in 1983 it was felt in the RIFP that the time was ripe for a conference dealing with problems concerning solitons The RIFP asked us to organize the conference The Organizing Committee consisted of R Hirota Hiroshima T Taniuti Nagoya Y H Ichikawa Nagoya M Toda Tokyo Z Maki Kyoto M Wadati Tokyo N Yajima Fukuoka S Takeno Kyoto Since its discovery the study of the soliton as a stable particle like state of nonlinear systems has caught the imagination of physicists and mathematicians Perspectives of Nonlinear Dynamics: Volume 1 E. Atlee Jackson, 1989 The dynamics of physical chemical biological or fluid systems generally must be described by nonlinear models whose detailed mathematical solutions are not obtainable To understand some aspects of such dynamics various complementary methods and viewpoints are of crucial importance In this book the perspectives generated by analytical topological and computational methods and interplays between them are developed in a variety of contexts This book is a comprehensive introduction to this field suited to a broad readership and reflecting a wide range of applications Some of the concepts considered are topological equivalence embeddings dimensions and fractals Poincaré maps and map dynamics empirical computational sciences vis vis mathematics Ulam's synergetics Turing's instability and dissipative structures chaos dynamic entropies Lorenz and Rossler models predator prey and replicator models FPU and KAM phenomena solitons and nonsolitons coupled maps and pattern dynamics cellular automata **Mathematical Structures in Continuous Dynamical Systems** E. W. C. van Groesen, Eduardus Marie de Jager, 1994 This work addresses several aspects of continuous dynamical systems all of which can be viewed as generalizations of methods from classical mechanics Equations such as the Korteweg de Vries non linear Schrodinger Sine Gordon and Boussinesq equations are treated in detail High Energy Physics Index , 1986 **Recent Developments in Nonequilibrium Thermodynamics: Fluids and Related Topics** J. introduction to the new science of nonlinear physics for advanced undergraduates beginning graduate students and researchers entering the field The chapters by pioneers and experts in the field share a unified perspective Nonlinear science developed out of the increasing ability to investigate and analyze systems for which effects are not simply linear functions of their causes it is associated with such well known code words as chaos fractals pattern formation solitons cellular automata and complex systems Nonlinear phenomena are important in many fields including dynamical systems fluid dynamics materials science statistical physics and particle physics The general principles developed in this text are applicable in a wide variety of fields in the natural and social sciences The book will thus be of interest not only to physicists but also to engineers chemists geologists biologists economists and others interested in nonlinear phenomena Examples and exercises complement the text and extensive references provide a guide to research in the field

Theory of Solitons in Inhomogeneous Media Fatkhulla Khabibullaevich Abdullaev, 1994-05-31 A systematic exposition concerned with the properties of solitons and their interaction as well as the generation of new structures This work deals exclusively with inhomogeneous media and the production and propagation of solitons in such media bringing the theory of soliton generation and propagation much closer to a wide range of physically significant applications

Труды И Материалы Научных Конгрессов И Совещаний, 1984 *Books in Print Supplement*, 1994 **Polymer Science**, 2001 The English version will include two issues chemistry and the physics of polymers

Quantum Field Theory Ferdinando Mancini, 1986 *Nonlinear Physics* Chaohao Gu, Yishen Li, Guizhang Tu, 1990 These refereed proceedings present recent developments on specific mathematical and physical aspects of nonlinear dynamics The new findings discussed in here will be equally useful to graduate students and researchers The topics dealt with cover a wide range of phenomena solitons integrable systems Hamiltonian structures Bäcklund and Darboux transformation symmetries finite dimensional dynamical systems quantum and statistical mechanics knot theory and braid group R matrix method Hirota and Painlevé analysis and applications to water waves lattices porous media string theory and even cellular automata

Mathematical Modelling and Applied Mathematics Aleksandr Andreevich Samarskiĭ, M. Sapagovas, 1992 Many complex problems of social life put forward new demands for science and technology It is quite obvious that further progress is impossible without methodological renovation of science Mathematical modelling and computational experiment make the basis for such renewal It lies in spreading the expertise ideas and methods of applied mathematics to new spheres The main purpose of this proceedings is to bring together the scientists in applied mathematics and computational experiment developers and users of mathematical models from different branches of knowledge in order to exchange ideas information and experience The volume contributes to a deeper understanding of contemporary interdisciplinary problems
