Negoita, 2004-10-14 We were very pleased to once again extend to the delegates and we are pleased to th say our friends the warmest of welcomes to the 8 International Conference on Knowledge Based Intelligent Information and Engineering Systems at Wellington stitute of Technology in Wellington New Zealand The KES conferences attract a wide range of interest The broad focus of the c ference series is the theory and applications of computational intelligence and em gent technologies Once purely a research field intelligent systems have advanced to the point where their abilities have been incorporated into many conventional appli tion areas The quest to encapsulate human knowledge and capabilities in domains such as reasoning

problem solving sensory analysis and other complex areas has been avidly pursued This is because it has been demonstrated that these abilities have definite practical applications The techniques long ago reached the point where they are being exploited to provide commercial advantages for companies and real beneficial effects on profits KES 2004 provided a valuable mechanism for delegates to obtain a profound view of the latest intelligent systems research into a range of algorithms tools and techniques KES 2004 also gave delegates the chance to come into contact with those applying intelligent systems in diverse commercial areas The combination of theory and practice represents a uniquely valuable opportunity for appreciating the full spectrum of intelligent systems activity and the state of the art

Introduction to System Dynamics Rohit Sabharwal,2025-02-20 Introduction to System Dynamics is an insightful guide to understanding complex systems such as businesses and ecosystems We explore how these systems function focusing on feedback loops time delays and non linear relationships We provide a systematic approach to analyzing these intricate systems using causal loop diagrams and stock and flow diagrams helping readers visualize the interactions between different system components Written clearly and supported by real world examples this book is valuable for both beginners and experienced professionals We emphasize the importance of considering the entire system rather than just individual parts to find better solutions to problems System dynamics is applicable in various areas including business government and healthcare By understanding these complex systems we can make informed decisions about critical issues Introduction to System Dynamics remains a classic resource equipping readers with the tools they need to understand and manage the complex world around them

Modeling the Dynamics of Consumer Behavior from Massive Interaction Data Mengting Wan,2019 Recent technological innovations e g e commerce platforms automated retail stores have enabled dramatic changes in people s shopping experiences as well as the accessibility to incredible volumes of consumer product interaction data As a result machine learning ML systems can be widely developed to help people navigate relevant information and make decisions Traditional ML systems have achieved great success on various well defined problems such as speech recognition and facial recognition Unlike these tasks where datasets and objectives are clearly benchmarked modeling consumer behavior can be rather complicated for example consumer activities can be affected by real time shopping contexts collected interaction data can be noisy and biased interests from multiple parties both consumers and producers can be involved in the predictive objectives The primary goal of this dissertation is to address the obstacles in modeling consumer activities through computational approaches but with careful considerations from economic and societal perspectives Intellectually such models help us to understand the forces that guide consumer behavior Methodologically I build algorithms capable of processing massive interaction datasets by connecting well developed ML techniques and well established economic theories Practically my work has applications ranging from recommender systems e commerce and business intelligence
