Stoll,Peter W. Carr,2022-12-30 Two dimensional liquid chromatography 2D LC is finding increasingly wide application principally due to the analysis of mixtures of moderate to high complexity Many industries are developing increasingly complex products that are challenging the separation capabilities of state of the art 1D LC and need new analytical methodologies with substantially more resolving power and 2D LC meets that need This text organized by two leaders in the field establishes a sound fundamental basis for the principles of the technique followed by a discussion of important practical considerations The book begins with an introduction to multi dimensional separations and a discussion of the history and development of the technique over the past 40 years followed by several chapters that provide a theoretical basis for development of 2D LC methods including foundational concepts regarding separation complementarity under sampling and dynamics of liquid chromatography separations Instrumentation for 2D LC is discussed extensively including practical aspects such as interface selection and setup Building on this foundation two separate chapters are focused on method development for non comprehensive and comprehensive separations followed by a chapter dedicated to data analysis Finally applications of 2D LC in several fields ranging from pharmaceutical analysis to polymer science are summarized The book is an important resource for both students and practitioners who are already using 2D LC or are interested in getting started in the field Key Features Demonstrates the conditions under which a 2D LC method should be considered as an alternative to a 1D LC method Establishes a sound fundamental basis of the principles of the technique followed by guidelines for method optimization Provides a single source for technical knowledge advances and practical guidance described in recent literature Assists with the initial decision to develop a 2D LC method Guides the reader in developing a high quality method that meets the needs of
